DPSK31245	Kentucky .45 kit	Vente libre	.45 BP	1	26.4	39	1000	1:18	780.00 € incl. tax

A faithful and compact kit for 1750-1850 reenactment.

This pistol kit is a careful reproduction of the period "Kentucky" model from 1750-1850, delivered for assembly and finishing by the user.

- **Caliber:** .45
- **Year of origin:** 1750-1850
- **Ignition system:** flintlock
- **Number of stripes:** 12
- **No scratches:** 450 mm (1:18?)
- **Barrel length:** 264 mm (10 3/8?)
- **Total length:** 390 mm (15 3/8?)
- **Weight:** 1.000 kg (2.31 lb)

Usage and context

Designed for reenactment and collecting, this kit reproduces the proportions and operation of pistols from the period 1750-1850. Assembly and adjustments allow for an aesthetic and functional result, suitable for demonstrations and historical shooting ranges (compliance with regulations required).

Canon and scratches

The 264 mm barrel combines compactness and stability. The **12 grooves** with a **450 mm (1:18?)** twist rate provide stabilization suitable for the .45 caliber, optimizing accuracy when firing with black powder.

Mechanism and ignition

The flintlock mechanism recreates the feel and ergonomics of old weapons: trajectory, ignition time and maintenance specific to black powder must be respected by the user.

Wood and finish

The **maple** handle provides an authentic silhouette and a comfortable grip. The kit allows for customization of the finish (sanding, staining, patina) according to scenographic or museum applications.

- **Kit includes:** wooden and metal parts for assembly
- **Wood:** maple for the stock and grip
- **Metal:** steel barrel and treated mechanism
- **Assembly:** requires basic tools and assembly skills

FAQ

- **Q: Do I need permission to buy it?**
  Check French regulations: some kits and replicas may require special conditions (declaration, category).
- **Q: Is it available in other calibers?**
  Variations exist (e.g. .50, .54) depending on the catalogues - check supplier availability.
- **Q: What kind of maintenance should be planned?**
  Cleaning after firing with a brush and oiling; special attention should be paid to black powder to avoid corrosion and deposits.
