SKU	Designation	French Law	MSRP
LE865	LEE, SIX PACK PRO KIT 38 SP #91903	Vente libre	819.00 € incl. tax

Complete 6-station progressive press kit for .38 Sp. / .357 Mag. reloading.

Complete **Lee Pro 6000** reloading kit equipped for .38 Special and .357 Magnum calibers, supplied with tray, powder measure, and dispenser for efficient production. **Lee Bench plate stand sold separately.**

- **Model:** Pro 6000 Six Pack (38 SP kit #91903)
- **Stations:** 6 stations (uses all types of dovetail tools)
- **Included:** Six Pack press, Auto Drum powder measure, shell plate, case dispenser, tool holder and .38/.357 caliber die set
- **COAL capacity:** up to 3.340" (84.84 mm) - e.g. .30-06)
- **Country of origin:** United States

Indexing & tooling

Indexing is automatic and simple: a single moving part manages station positioning without laborious adjustments. The **Breech Lock Quick Change** system securely holds tools in the upper holder-no need to change an entire turret during use.

Jack and structure

The press is built on a **steel** frame and features a massive cylinder (Ø 28.4 mm) sliding on 82 mm of steel, providing a large support surface for operations on magnum or long cases. This robust design improves durability and repeatability in production.

Priming and collection system

The automatic priming device works with all brands and sizes of primers (small & large); the primer is inserted at the end of its travel to keep the six stations free for operation. The collection tube retrieves the spent primers in a protected position.

Feeding and ejection

The kit includes an **Auto Drum** powder measure and a dispenser/universal shell plate allowing automatic case insertion; an automatic ejector transfers finished cartridges to the ammunition tray, facilitating continuous production.

- **Shell plate:** steel with Zamak 5 platter cover
- **Tool head:** machined aluminum
- **Fixings:** steel linkage and columns for stability
- **Tool change:** quick, including primer size adjustment without complicated disassembly

Practical use

Ideal for reloading .38 Special and .357 Magnum in medium to high production runs: the kit allows the use of tools from various brands and quick adaptation of the machine to different case sizes. The design minimizes wear parts and adjustments required by the operator.

FAQ

- **Q: Is this kit suitable for .38 Special and .357 Magnum?**

Yes - the kit supplied is configured for these gauges and includes the appropriate tools for the Lee Pro 6000 press.

- **Q: Can we use tools from other brands?**

Yes. The press accepts most standard tools; the Breech Lock system facilitates the mounting of compatible tools.

- **Q: What is the maximum cartridge length supported?**

The maximum COAL length is 3.340" (?84.84 mm), suitable for long cartridges such as the .30-06.
