SKU	Designation	French Law	MSRP
LE880	LEE Bulge Buster Kit #90487	Vente libre	29.00 € incl. tax

Eliminates case base deformation on short calibers with high recoil.

The **Lee Bulge Buster Kit** is a **complete resizing system** that eliminates typical case base bulges. It is used with a carbide **Factory Crimp Die** (sold separately) to push cases through the crimping die.

- **Use:** full-thickness recalibration
- **Compatibility:** short rimmed calibers (see list)
- **Supported calibers:** .380 ACP, 10mm Auto, .40 S&W, .45 ACP, .45 GAP, .45 Win Mag, .41 AE
- **Included components:** guide sleeve, pusher, recovery tube, instructions
- **Required use:** single-station press or turret without index rod

A simple solution against deformed cases

The **Lee Bulge Buster Kit** is designed to eliminate the **case base bulge** that is often missed by standard resizing tools due to the presence of the shell holder. This common defect in short-bore, high-recoil calibers can lead to chambering or extraction problems.

A push-through system through the Factory Crimp Die

The principle is simple: the case is pushed up and down through a **Lee Carbide Factory Crimp Die** (not included). The kit includes a **pusher** and **guide sleeve** for this operation, as well as a red plastic **catcher** screwed onto the top.

Limited but targeted compatibility

This system only works with certain popular calibers: **.380 ACP, .40 S&W, 10mm Auto, .45 ACP, .45 GAP, .45 Win Mag** , and **.41 AE** . The use of a matching **Factory Crimp Die** is essential. The Bulge Buster is not applicable to other calibers.

Mounting on single-station press only

The kit is used on a standard **single-station** press or on a **turret press without an indexing rod** . It is not compatible with automatic or progressive presses in a complete cycle.

Important warning

If your cases require this treatment, **do not use reloaded ammunition in unsupported chambered firearms** : the initial defect could indicate a weakness in the case, potentially

dangerous.

FAQ

Which calibers are compatible with the Bulge Buster?

The kit is designed for: .380 ACP, 10mm Auto, .40 S&W, .41 AE, .45 ACP, .45 GAP, .45 Win Mag.

Is the Factory Crimp Die included?

No, you must purchase a separate Lee Carbide Factory Crimp Die suitable for the caliber you wish to process.

Can I use this kit with an automatic press?

No, the Bulge Buster is only used on single-station presses or turret presses with the indexing rod removed.
