Invisible ultrasonic barrier to repel cats outdoors.

The **Num'Axes Cat Stop Eyenimal cat repellent** is an effective solution to deter cats and unwanted animals using ultrasound imperceptible to humans, but very bothersome to animals.

- **Technology:** ultrasound + flash light
- **Range:** up to 70 m²
- **Power supply:** 3 LR06 batteries (not included)
- **Use:** Outdoor use only
- **Waterproofing:** resistant to drips
- **Weight:** 278 g (with batteries)
- **Dimensions:** 113 x 80 x 53 mm

A non-invasive deterrent device for outdoor use

Designed to **repel cats** without contact or chemicals, the **Num'Axes Eyenimal Cat Stop** works by emitting ultrasound accompanied by flashing lights. Discreet to humans but disturbing to animals, these signals act as an **invisible barrier**, effective over a **perimeter of 70 m²**.

Three emission modes to choose from

The Cat Stop offers three **activation frequencies**: every 50 seconds, every 2 minutes, or every 5 minutes, with a 20-second emission duration. The user can therefore adjust the frequency according to the level of traffic in the areas to be protected (vegetable gardens, flowerbeds, walkways, etc.).

Simple and adaptable installation

The housing can be easily mounted on a wall or planted directly in the ground using its **included removable stake**. It is perfectly suited for **outdoor use**, with a housing that is watertight and

splash-proof.

A safe device

Ultrasound has no harmful effects on cats: it only works by causing auditory discomfort. This device therefore offers a **gentle alternative** to more invasive methods while ensuring effective protection of sensitive areas.

FAQ

Is this repellent safe for cats?

Yes, ultrasound is harmless: it disturbs without harming or causing lasting stress to the animal.

Can it be used indoors?

No, this model is designed exclusively for outdoor use.

What type of power supply is needed?

The device operates with 3 x 1.5V LR06 batteries (not included).
