4G camera trap with Cloud, multi-operator SIM and remote access.

The **Num'Axes PIE1058 4G camera trap** allows you to send photos and videos directly to a **secure cloud** , thanks to its included **multi-operator SIM card** and **dedicated mobile application** .

- **Transmission:** 4G, multi-operator SIM card included
- **Storage:** Cloud + SD/microSD card up to 32GB (not included)
- **App:** PIE Cloud (iOS/Android)
- **PIR sensor:** 60° detection angle, range up to 20 m
- **Flash:** Infrared, 60 invisible black LEDs
- **Photo resolution:** up to 24 MP
- **HD video:** 720p with audio, Cloud preview 3 seconds
- **Screen:** 2.4" color TFT
- **Power supply:** 12 AA batteries (or optional 12V external power supply)
- **Waterproof rating:** IP66

4G transmission and dedicated mobile application

With its **4G connection** and **multi-operator SIM card** (Orange, SFR, Bouygues), the PIE1058 automatically selects the best available signal. Files are sent via the free **PIE Cloud** app, accessible anytime, anywhere. A free data plan is even included.

Photos and videos can be viewed remotely

Photos (640x480 px) and video previews (3 seconds) are sent to the cloud. Upon request, you can receive **HD photos (1920x1440)** or **10-second HD 720p videos** . Adding tags makes **file management** easier (customizable tags for wild boar, vehicle, human, etc.).

Precise detection, invisible flash

The PIR sensor covers a **60°** angle with a range of **20 meters** . The infrared flash with **60 invisible black LEDs** ensures nighttime shots without disturbing wildlife. The flash can be adjusted, and certain LEDs can be disabled to prevent overexposure.

Remote configuration and advanced options

Trigger or configure your device remotely, in PIR or **Time Lapse** mode. A remote 4G antenna (with magnetic base and 2m cable) improves reception in areas with weak coverage. Integrated GPS adds **geographic coordinates** to each image.

Designed for the terrain

The PIE1058 is **IP66 waterproof** and **has a fast trigger time** (0.35 s). It operates on 12 AA batteries or an external 12V power supply. The 2.4" color TFT screen makes on-site adjustments easy. Loop recording is available so you never run out of memory.

FAQ

Can I use a different SIM card than the one provided?

No, the device only works with the multi-operator SIM card included with the purchase.

Does the application allow remote control of the device?

Yes, via the PIE Cloud application, you can trigger, configure or view media remotely.

Does this camera trap work without a mobile network?

Yes, but it won't send files to the cloud. It will save to a memory card up to 32GB.
