- **Photo resolutions:** 8 MP / 12 MP / 24 MP
- **Video:** WVGA / 720p / 1080p with audio
- **Storage:** SD/microSD card up to 32GB (32GB card included)
- **Power supply:** 12 AA batteries included (alkaline)
- **App:** NumCam (Android/iOS)
- **Screen:** 2.4" color LCD
- **Waterproof rating:** IP66

Complete ready-to-use package

This kit includes everything you need to get started: a **PIE1046 trail camera** , **12 AA batteries** , and a **32GB memory card** . No additional purchases are necessary to begin monitoring immediately upon installation.

Fast 4G transmission + integrated GPS

The PIE1046 transmits photos via **MMS or email** and videos via email only. Thanks to **4G** , sending speed is increased and power consumption is reduced. The **integrated GPS** allows you to **geotag each shot** directly from the user interface.

Ultra-wide capture and precise detection

Equipped with a **wide 100° detection and shooting angle** , this trap covers a large area. It detects up to 20 meters and allows you to disable certain infrared LEDs to **prevent overexposure at night** or to film at close range.

Configurable remotely and versatile

The PIE1046 is fully configurable remotely via the **NumCam** app (Android/iOS). It offers several **capture modes** (photo, video, hybrid, time-lapse), and the user can adjust sensitivity, night exposure time, frame rate, etc.

Robust, reliable and easy to use

Waterproof (**IP66**), fast (**0.4 s**), with a **color LCD screen** and a supplied **magnetic remote antenna** , this trap is suitable for harsh conditions. It accepts an optional **external power supply** (solar panel or 12V power supply).

FAQ

Does the trap work with a standard SIM card?

Yes, the device works with a standard SIM card and automatically detects the operator upon insertion.

Does the pack include everything needed for installation?

Yes, the pack includes the PIE1046 camera, 12 AA batteries, a 32GB memory card, an antenna and a mounting strap.

Can we receive the videos via MMS?

No, the videos are only transmitted via email, provided that the 4G network is available.
