SKU	Designation	French Law	MSRP
NUMP0170	Antenne pour pièges photographiques PIE1046, PIE1052 et PIE1058	Vente libre	24.00 € incl. tax

Improve the network reception of your PIE cameras with one simple step.

Designed for **NUM'AXES PIE1046, PIE1052 and PIE1058 camera traps** , this 4G antenna optimizes **network signal reception** for faster and more reliable transmission of captured photos or videos.

- **Compatibility:** PIE1046, PIE1052, PIE1058
- **Type:** External 4G antenna
- **Mounting:** direct screwing onto the camera
- **Mounting:** integrated connector
- **Color:** black

Quick and secure installation

The antenna easily attaches to the camera using a **screw system** located on the top of the device. Once installed, it enhances **mobile network reception** , ensuring faster file transfer speeds, especially in areas with poor coverage.

Exclusive compatibility

This model is designed for use exclusively with the NUM'AXES **PIE1046** , **PIE1052,** and **PIE1058** cameras. It requires no specific configuration: simply screw in the antenna for optimal connectivity.

Usage tips

Make sure to screw the antenna in securely without overtightening. A good attachment ensures a **stable signal** and prevents accidental loosening outdoors.

FAQ

Is this antenna compatible with all NUM'AXES cameras?

No, it is exclusively compatible with NUM'AXES PIE1046, PIE1052 and PIE1058 camera traps.

How do I attach this antenna to the camera?

Simply screw it into the designated spot at the top of the camera. Make sure to tighten it securely, but do not overtighten.

Does it actually improve network reception?

Yes, this antenna is designed to enhance the stability and quality of the 4G signal in areas with poor coverage.
