NUMP0029	2 électrodes longues Canicom	Vente libre	10.00 € incl. tax

Optimizes conduction on long hair for all Canicom NUM'AXES collars.

NUM'AXES long electrodes are specially designed to ensure effective stimulation of **Canicom collars** on long-haired dogs. Supplied in a pack of 2, they provide better conduction without compromising comfort.

- **Compatibility:** All Canicom collars
- **Use:** Long-haired dogs
- **Quantity:** Pack of 2 electrodes
- **Color:** Silver
- **Manufacturer reference:** CPSSELOT002

Designed for long-haired dogs

Long electrodes are ideal for dogs with dense or thick fur that might hinder direct contact with the training collar. By increasing the contact length, they allow for **effective and consistent electrical stimulation** without the need to overtighten the collar.

Compatible with the entire Canicom range

Whether you use a **Canicom 800** , **Canicom 1500** , or a **Canicom for small dogs** , this set of two long electrodes fits perfectly with all collars from the brand. An **essential accessory** if your dog has thick fur.

Genuine accessory - Guaranteed reliability

These electrodes are the same as those supplied with the original products. They therefore guarantee **compatibility** and **conductivity** for everyday use. Easy to screw in, they ensure optimal longevity.

FAQ

Are these electrodes compatible with all Canicom models?

Yes, they are suitable for all Canicom training collars regardless of the version.

Should I use them if my dog has short hair?

No, for a short-haired dog, the standard electrodes provided are sufficient. The longer ones are reserved for long-haired dogs.

How many electrodes are in this batch?

This set contains 2 long silver electrodes compatible with all Canicom collars.
