Electrodes for short hairs - compatible with Canicalm Premium NUM'AXES.

NUM'AXES short electrodes provide effective stimulation for short-haired dogs equipped with the **Canicalm Premium collar** . As an original accessory, they guarantee comfort and performance during training.

- **Compatibility:** Canicalm Premium
- **Use:** Short-haired dogs
- **Quantity:** Pack of 2 electrodes
- **Color:** Silver
- **Manufacturer reference:** CPSSELOT011

Controlled contact for guaranteed effectiveness

These **short electrodes** are designed to establish direct contact with the skin of **short-haired** dogs. They allow for precise transmission of stimulation without the need for excessive pressure, for **training without discomfort** .

Exclusive Canicalm Premium compatibility

Designed specifically for the **Canicalm Premium anti-barking collar** , these electrodes simply screw on to replace the original ones. This set of two is ideal for replacing lost or worn electrodes, or simply for having a spare set.

Original quality - Easy to install

They retain all the technical properties of the original device: **resistance, stability, compatibility** . This is essential to guarantee the proper functioning of the collar over the long term.

FAQ

Are these electrodes compatible with all Canicalm collars?

No, they are designed for the Canicalm Premium model. For other versions, use the specific electrodes.

What type of skin is suitable for these electrodes?

They are recommended for short-haired dogs. For long-haired dogs, choose the longer electrodes (ref. NUMP00202).

Does this set include the fixing screws?

No, the set only contains 2 short electrodes. The screws are already present on the original clamp.
