Protects the collar against water and dust - simple and effective assembly.

The **NUM'AXES sealing gasket** is designed to guarantee a **watertight seal** between the **lid and the housing** of your training collar. An essential accessory for outdoor activities.

- **Compatibility:** NUM'AXES electronic collars (compatible models)
- **Function:** Sealing between lid and casing
- **Manufacturer reference:** CPMECPLA010
- **Color:** Black
- **Installation:** Easy to attach

A reliable barrier against moisture

This **lid seal** is designed to create a **hermetic seal** between the collar cover and its electronic housing. It prevents any infiltration of water, mud, or dust, **even in rain** or damp conditions.

Specifically designed for outdoor use

Whether for a **training session in the woods** or a **daily ride in the rain** , this seal ensures the protection of the collar's components. It fits perfectly into the groove in the lid designed for this purpose.

Ease of installation and durability

Made from **durable black rubber** , this seal is easy to insert, won't deform with use, and retains its properties even after multiple openings of the case. An essential accessory to keep as a spare.

FAQ

Is this seal compatible with all NUM'AXES collars?

It is designed for certain NUM'AXES training collar models. You should check compatibility with your device.

Do I need to replace this seal regularly?

It is recommended to check it at each battery change or maintenance, and to replace it if it is worn or damaged.

Is it easy to install?

Yes, this seal fits easily into its housing and stays securely in place once positioned.
