Tactical screwdriver in .50 format with 36 6.35 mm bits in Cerakote case.

The **GUN POWER TOOL 37-piece .50 Caliber Screwdriver Set** is a versatile kit with a design inspired by heavy ammunition, ideal for everyday repairs as well as professional use. Delivered in a rigid **Cerakote** -coated case, it includes an aluminum handle and 36 robust 6.35 mm bits.

- **Number of bits:** 36 bits, 6.35 mm
- **Bit format:** standard 1/4" (non-precision)
- **Handle:** aluminum with anti-slip thread
- **Inspiration: .50 cal** bullet
- **Tip treatment:** solvent-free, heavy metal-free
- **Case: Cerakote** ceramic steel

A screwdriver inspired by the .50 caliber

The grip replicates the imposing lines of a **.50 BMG** cartridge. Solid and visually striking, it is machined from an **aluminum alloy** with anti-slip threading, ensuring a **firm and comfortable grip** , even during prolonged use.

6.35 mm bits : strength and compatibility

Unlike the precision 4mm mini bits, this kit includes **standard 1/4" bits** designed for **high-torque applications** : furniture screws, rugged electronics, airsoft equipment, etc. Their solvent- and heavy-metal-free treatment gives them **strength and durability** .

Cerakote case : military-grade durability

The metal carrying case is coated with **Cerakote** , the ceramic coating used in weaponry for its **resistance to wear, corrosion, and impacts** . Ideal for protecting tools and transporting them in demanding environments.

A multi-purpose, ready-to-use set

Designed for **everyday repairs** , **equipment assembly** , and **tactical maintenance** , this set combines professional aesthetics with practical efficiency. Each bit is securely held in a custom-cut foam insert for quick access and optimal storage.

FAQ

Is this kit suitable for demanding screwing applications?

Yes, 6.35 mm bits are designed for higher tightening torques than precision kits.

Is the handle comfortable to use?

Yes, it is made of machined aluminum with anti-slip threading for excellent grip, even for extended periods.

What type of treatment do the tips receive?

They are treated without chemical coating or heavy metals, for a natural, resistant and eco-friendly finish.
