Compact and modular GBB airsoft replica for maximum realism.

The **APFG MPX GBB** is an SMG-type **GBB airsoft replica** , designed to offer marked mechanical realism and high modularity in an ultra-compact format.

- **System:** Gas Blowback (GBB)
- **Length:** 350 mm
- **Weight:** 1950 g
- **Inner barrel length:** 90 mm
- **Power:** 1.2 joules
- **Magazine capacity:** 30 rounds
- **Color:** Black

MPX platform: compact and efficient

The **APFG MPX** draws inspiration from **modern SMG** design to offer a short, maneuverable replica perfectly suited to **CQB** environments. Its compact size allows for rapid movement and excellent handling in confined spaces.

Immersive Gas Blowback System

The **GBB (** Gas Blowback) action provides a satisfying recoil and a realistic mechanical feel with each shot. This cinematic experience enhances immersion and offers user feedback close to that of a real-world platform.

Modular design

The **MPX GBB** features a **modular design** that allows for quick configuration changes. This versatility is ideal for adapting the replica to different play styles or scenarios.

Adjustable hop-up and controlled precision

The **adjustable hop-up** allows you to optimize the BB trajectory depending on the BB weight used and the engagement distance. Despite its **90mm** inner barrel, accuracy remains consistent for CQB use.

Firing modes and tactical control

The **APFG MPX** features several firing modes: **Safe** , **Semi-automatic** , and **Full automatic** . This versatility allows for quick adaptation to game rules and situations.

Premium manufacturing and reliability

Made in **Taiwan** , the replica uses high-quality materials: **metal** , **aluminum** , **reinforced polymer** , and **rubber** . It's designed to last and withstand regular use.

Box contents

The **APFG MPX GBB** comes with a **30-round gas magazine** , ready to use after hop-up adjustment.

FAQ

Is this replica suitable for CQB?

Yes, the compact size of the **APFG MPX GBB** makes it particularly suitable for CQB environments and short-range engagements.

What is the power of the replica?

The power is less than or equal to **1.2 joules** , depending on the version and the target market, subject to site regulations.

What type of gas is recommended?

A **12 kg gas cylinder** is recommended to ensure reliable operation and preserve the internal mechanics.
