Receive your photos via MMS or email with a free SIM card.

The **NUM'AXES PIE1152** is a 4G cellular camera trap designed to transmit photos directly via MMS or email, with a free choice of SIM card.

- **Sending photos:** By MMS or email
- **SIM card:** Completely free choice of operator
- **Photo resolution:** Up to 32 MP
- **Video resolution:** Up to Full HD
- **Viewing angle:** 60°
- **Detection angle:** 60°
- **Detection range:** Approximately 20 m
- **Trigger speed:** 0.4 seconds
- **Waterproof rating:** IP66

Total control from your smartphone

The captured photos are automatically transmitted to the free **TrailCam Go** mobile app, available on Android and iOS. From the app, the user can modify all settings, view received images, and manage multiple devices simultaneously.

Complete freedom in choosing the operator

Unlike other models, the **NUM'AXES PIE1151** allows for **complete freedom in choosing the SIM card** . It works with 2G, 3G and 4G networks, making it possible to adapt the subscription to local coverage and the desired sending frequency.

Precise detection and invisible night vision

The PIR sensor offers a 60° detection angle and a range of approximately 20 meters, with adjustable sensitivity (low, medium, or high). Invisible infrared LEDs ensure discreet monitoring day and night, without disturbing wildlife.

Versatility of capture modes

The trap offers a classic motion detection mode as well as a **Time Lapse mode** . Photos can be taken in bursts (1 to 3 shots) and videos are programmable from 5 seconds to 3 minutes, with automatic sending of the first image of the video to the application.

Designed for durable field use

With an **IP66 waterproof** rating, the casing is weatherproof and resistant to harsh outdoor conditions. It operates on 8 AA batteries and can also be powered by an external 6V source, such as a solar panel, to extend its operating time.

Box contents

- 1 **NUM'AXES PIE1151** cellular camera trap
- 1 cellular antenna
- 1 pair of tweezers for inserting or removing the SIM card
- 1 USB Type-C cable
- 1 wall mounting kit
- 1 nylon fastening strap
- 1 quick start guide

FAQ

Does the PIE1151 work with any SIM card?

Yes, this model allows for a completely free choice of SIM card and operator.

Are the videos sent to the application?

No, only photos are sent. However, the camera transmits the first frame of each video.

Can the camera be powered by a solar panel?

Yes, an external 6V power supply is available as an option, notably via a solar panel.
