Connected outdoor surveillance with 360° vision and automatic tracking.

The **NUM'AXES CAM1200** is a 360° outdoor surveillance camera combining Wi-Fi and 4G connectivity, designed to offer real-time remote control and complete panoramic coverage.

- **Type:** 360° Wi-Fi/4G Surveillance Camera
- **View:** Panoramic and close-up live
- **Detection:** Human with automatic tracking
- **Night vision:** Color or infrared
- **Power supply:** Solar or mains
- **Protection rating:** IP66

360° panoramic surveillance

Thanks to its motorized design and **triple lens**, this camera ensures complete coverage of the monitored area. It allows the simultaneous display of two live video feeds: a panoramic view and a close-up, so you don't miss anything in the surroundings.

Integrated Wi-Fi and 4G connection

The **NUM'AXES CAM1200** works with both **Wi-Fi** and **4G**, offering great installation flexibility. In Wi-Fi mode, the range reaches approximately 80 meters, while the cellular connection allows for remote monitoring without a local network.

Human detection and automatic tracking

The camera incorporates **intelligent human detection** combined with automatic motion tracking. When a presence is detected, the camera adjusts its orientation to keep the subject within the field of view.

Advanced Night Vision

Day or night, surveillance remains effective. Night vision is available in **color or infrared mode** , ensuring good image readability regardless of lighting conditions.

Real-time remote control

All functions are accessible via a **free mobile app** compatible with iOS and Android. Users can view the live video feed, control the camera remotely, and manage real-time alerts.

Robust and self-contained outdoor installation

Certified **IP66** , the camera is designed to withstand the elements. It offers **dual power options** : solar for extended battery life or mains power for permanent installation. Mounting is possible on walls or ceilings, depending on the site configuration.

Enhanced security features

The camera features a deterrent **audible and visual alarm** as well as a **10x digital zoom** , useful for precisely identifying an event remotely.

FAQ

Does the camera work without a Wi-Fi network?

Yes, it can operate on 4G for remote monitoring without a local Wi-Fi connection.

Can the camera be used solely on solar power?

Yes, the camera has a solar power supply and can also be connected to mains power if necessary.

Is night vision in color?

Yes, the camera offers color or infrared night vision depending on the settings chosen.
