The 360° Wi-Fi and 4G camera that effectively monitors all your sites, even without an internet box.

The **NUM'AXES CAM1200 surveillance camera** combines dual **Wi-Fi** and **4G connectivity** , panoramic vision, and a **355° PTZ** lens for complete coverage. Its **intelligent human detection** with automatic tracking and **color night vision** ensure reliable surveillance day and night. Powered by **a solar panel** , integrated battery, or mains electricity, it is easy to install in residential or commercial settings.

- **Connectivity:** 2.4 GHz Wi-Fi and 4G
- **Storage:** microSD card up to 128GB and Cloud
- **App:** NiView (iOS and Android)
- **Power supply:** 9W solar panel, 12,000mAh battery, or mains power
- **Waterproof rating:** IP66
- **Installation:** Wall or ceiling

- **Video resolution:** 2K Ultra HD
- **Sensors:** Dual 2MP color CMOS sensors
- **Panoramic lens:** 2.8 mm - 130° viewing angle
- **PTZ lens:** 6 mm - 355° rotation - 10x digital zoom
- **Night vision:** Color via white or infrared flashes
- **Detection:** Automatic detection and tracking of people
- **Detection range:** Adjustable up to 45 m
- **Audio:** Two-way communication
- **Warranty:** 2 years

Surveillance adapted to all environments

The **NUM'AXES CAM1200** was designed to protect homes, workshops, farm buildings, warehouses, and remote sites alike. Its **dual Wi-Fi and 4G connectivity** allows for installation both

near an internet router and in areas completely without a fixed network connection. This versatility offers great installation flexibility without compromising surveillance performance.

A panoramic cover with motorized PTZ lens

Thanks to its combination of a wide-angle panoramic view and a **355° PTZ** lens, the camera covers a large area while still being able to precisely track activity. The **10x digital zoom** allows you to observe even more detail when needed. Both video feeds can be viewed simultaneously from the mobile app for particularly convenient monitoring.

Intelligent detection with automatic tracking

Integrated artificial intelligence distinguishes human presence and can automatically activate motorized tracking when a person is detected. Sensitivity and detection range, adjustable up to approximately 45 meters, allow operation to be adapted to terrain characteristics to minimize unnecessary triggering.

Active protection day and night

The camera provides excellent visibility in all lighting conditions thanks to its **color night vision** via LED spotlights or infrared mode. Its audible and visual alarm system can be triggered automatically upon detection or manually via the app to enhance its deterrent effect.

A self-sufficient power supply for isolated sites

The **9W solar panel** , combined with an integrated **12,000mAh** battery, ensures excellent autonomy while minimizing maintenance. Mains power is also an option. Thanks to its **IP66** rating, it effectively withstands harsh weather conditions and is suitable for both indoor and outdoor installation.

Easy control via the mobile app

The **NiView** app, available on iOS and Android, allows you to view live video, receive notifications, control camera movements, activate alarms, communicate via two-way audio and manage recordings stored on microSD card or in the cloud.

FAQ

Can the camera work without a Wi-Fi connection?

Yes. Thanks to its 4G connectivity, it can be used on a site without an internet box, provided a compatible SIM card is used.

Can it be installed outdoors?

Yes. Its IP66 rating allows for durable outdoor use against rain, dust and common weather conditions.

How are the videos recorded?

Recordings can be saved to a microSD card up to 128 GB (minimum class 10) or to cloud storage available via the NiView app.
