Comfortable and compact electronic hearing protection.

The **NUM'AXES CAS1551** is an electronic noise-canceling headset designed to effectively attenuate harmful noises while amplifying faint sounds, offering comfort and protection during noisy activities.

- **Type:** Electronic noise-canceling headphones
- **Noise attenuation:** SNR 28 dB
- **Microphones:** 2 high-frequency microphones
- **Amplification:** Soft sounds amplified up to x5
- **Pads:** Replaceable silicone
- **Shells:** Thinned to facilitate shouldering

Effective electronic hearing protection

The **NUM'AXES CAS1551** provides attenuation of harmful noise from 82 dB, with an **SNR index of 28 dB** . It thus makes it possible to effectively reduce noise pollution while preserving a sense of the environment.

Amplification of useful sounds

Thanks to its **two high-frequency microphones** , the headset amplifies quiet sounds up to five times. This feature enhances the perception of useful ambient noise while automatically cutting out excessively loud sounds.

Comfort and ergonomics for everyday use

The **replaceable silicone pads** ensure good comfort during extended wear. The slimmer shells are designed to facilitate shouldering, while the adjustable headband guarantees a precise fit.

Compact and practical format

The helmet is **foldable and compact** , making it easy to transport and store. A practical choice for users looking for functional, discreet, and portable equipment.

FAQ

What is the attenuation level of CAS1551?

This headset offers a noise attenuation SNR of 28 dB.

Does the headset amplify quiet sounds?

Yes, faint sounds can be amplified up to five times thanks to the built-in microphones.

Are the bearings replaceable?

Yes, the headset is equipped with replaceable silicone ear pads.
