Lightweight and efficient MWS charger, designed to multiply GBBR reloads.

The **VORSK Airsoft VMAR Series MWS 40R** is an airsoft gas magazine designed for MWS platforms, combining realistic capacity, optimized gas efficiency and accessible design for intensive GBBR use.

- **Type:** Gas charger
- **Capacity:** 40 marbles
- **Compatibility:** Compatible with MWS replicas
- **Outer material:** HIPS polymer
- **Internal structure:** Steel
- **Weight:** 565 g
- **Colors:** Black, Tan, Gray

An MWS-optimized charger

Developed specifically for **MWS gas blowback** platforms, this magazine adopts a **realistic capacity of 40 rounds** , perfectly suited to players seeking immersion, reload management and mechanical consistency on the field.

Gas efficiency and controlled architecture

The deliberately simplified internal design minimizes energy losses and unnecessary mechanical interactions. This approach improves **gas efficiency** and allows for firing up to **approximately 100 BBs per fill** under standard conditions, while maintaining a consistent cycle.

Steel structure and HIPS polymer envelope

The magazine features an **internal steel structure** that ensures a realistic weight and good inertia during handling. The external **HIPS polymer** casing provides excellent impact resistance while keeping the overall weight down to 565 g.

Valve compatibility and simplified maintenance

The **VMAR Series 40R** uses a **VORSK inlet valve** common to the **VMP** and **Hi-Capa** series, paired with a **VORSK VMP outlet valve** . This logical choice simplifies maintenance, parts availability, and the management of a homogeneous fleet of loaders.

An accessible format for equipping yourself with GBBRs

Positioned competitively, this magazine makes it easier to build a complete set for MWS platforms. It supports realistic, durable, and smooth GBBR gameplay without increasing technical or budgetary constraints.

FAQ

Is this charger compatible with all MWS replicas?

Yes, it is compatible with gas blowback airsoft replicas using the MWS standard.

What is the range per gas refill?

Under standard conditions, one fill allows you to fire up to approximately 100 BBs.

What colours are available?

This model is available in three colours: Black, Tan and Grey.
