A lighted handlebar for quick and natural acquisition.

The **EASY HIT 71mm Ø 3mm Fiber Optic** is a **fiber optic front sight** designed to improve the visibility of the line of sight and facilitate rapid target acquisition while **hunting** .

- **Type:** Fiber optic guide
- **Color:** Red or green
- **Length:** 71 mm
- **Diameter:** 3 mm
- **Attachment:** 3M adhesive
- **Compatibility:** Flat strip ? 6 mm
- **Structure:** Optical fiber with protective composite casing

Enhanced visibility in real-world conditions

Fiber optic technology captures ambient light to produce a sharp, well-defined red or green dot. In the undergrowth, at dawn or dusk, the front sight remains visible without dazzling or distracting the target. This maintains a clear reference point while preserving natural peripheral vision.

Simple installation without modification

The mount is secured using a high-strength **3M adhesive** . No drilling or modification of the barrel is required. The system is compatible with rifles featuring a **flat rib of at least 6 mm** , ensuring a stable and secure attachment.

Sustainable construction for the land

The fiberglass is protected by a **composite housing** designed to withstand external conditions: humidity, temperature variations, and repeated handling. Compact and lightweight, this front sight integrates perfectly with the weapon's lines.

An asset for hunting small and large game

Whether driven hunts or stalking, an effective visual reference facilitates quick barrel alignment. **Fiber optics** improve the perception of the rifle's position, contributing to more instinctive aiming.

FAQ

Does this handlebar require a modification to the rifle?

No, the installation is done using 3M adhesive directly onto the flat band of the barrel, without drilling or permanent modification.

Is it compatible with all rifles?

It is compatible with rifles equipped with a flat rib at least 6 mm wide. The dimensions should be checked before installation.

Does fiber optics work in low light?

Yes, it captures ambient light and remains visible at dawn, dusk or in the undergrowth, improving the perception of the handlebars without glare.
