- **Compatibility:** Canifugue NUM'AXES range
- **Installation:** Quick and easy connection
- **Use:** Anti-escape fence for dogs (ref. NUM215)
- Photos are for illustrative purposes only.

Optimal signal continuity

In an **anti-escape fence** , the quality of the antenna wire connection is essential. These connectors ensure a reliable link between two sections of cable, thus maintaining the continuity of the signal emitted by the transmitter. In practice, it's a discreet accessory... but indispensable for the proper functioning of the system.

Quick and easy installation

Designed for intuitive installation, they allow for easy connection or repair of **perimeter wire** . Ideal for perimeter extensions, landscaping modifications, or spot repairs.

Canifugue range compatibility

This set is compatible with the following models:

- **Canifugue FUG1030**
- **Canifugue Mix FUG1031**
- **Canifugue FUG1032**
- **Canifugue Mix FUG1033**
- **Small Canifugue**
- **Canifugue Pro**

Essential accessory for maintenance

Having extra connectors allows you to anticipate adjustments to the terrain. Whether it's to expand the permitted area or repair a cable cut during outdoor work, this 3-piece set is a handy item to keep on hand.

FAQ

Are these connectors compatible with all Canifugue systems?

They are compatible with the Canifugue FUG1030, FUG1031, FUG1032, FUG1033, Canifugue Small and Canifugue Pro models.

What are these connectors used for?

They allow two sections of antenna wire to be connected in order to ensure the continuity of the perimeter of the anti-escape fence.

Is a specific tool required for installation?

Installation is simple and does not require any complex tools. However, a clean connection is necessary to ensure a reliable connection.
