NUM'AXES

SKU	Designation	French Law	MSRP
NUMP0161	NUM'AXES 5m Cable 12V Solar Panel	Vente libre	26.00 € incl. tax

Easily extend the power supply to your 12V solar panel.

The **NUM'AXES 5m 12V Solar Panel Cable** allows you to efficiently connect your **12V solar panel** to your compatible equipment. Robust and practical, it offers a comfortable length to optimize panel exposure.

- **Length:** 5 meters
- **Compatible voltage:** 12 Volts
- **Compatibility:** 12V solar panel (Num'Axes ref: NGPIEACC038)
- **Connectivity:** Connectors compatible with NUM'AXES equipment
- **Use:** External power supply for compatible devices

Optimize the exposure of the solar panel

At **5 meters long**, this cable offers true installation freedom. It allows you to position the **12V solar panel** in the sunniest area while leaving the device in its chosen strategic location. In practice, this improves charging performance without the constraint of immediate proximity.

Dedicated NUM'AXES compatibility

This model is specifically compatible with the **NUM'AXES 12V solar panel, ref. NGPIEACC038**. The connectors ensure a simple and secure connection with compatible equipment from the same brand.

Reliable external power supply

Ideal for fixed outdoor installations, this cable helps maintain a **continuous power supply** via solar energy. It's a particularly suitable solution for **autonomous monitoring** devices requiring a stable, long-term power source.

Additional features

- **Use:** Solar power cable extension
- **Installation:** Direct connection without modification
- **Environment:** Outdoor use

FAQ

Is this cable compatible with all 12V solar panels?

It is designed for use with the NUM'AXES 12V solar panel, reference NGPIEACC038. It is recommended to check the compatibility of the connectors before using it with another model.

Can it be used outdoors all year round?

Yes, it is intended for outdoor use as part of a suitable and properly protected solar installation.

What is the purpose of a 5-meter cable?

This length allows the solar panel to be positioned in a location well exposed to the sun, even if the powered device is installed remotely.
