Box contents.

- Two interchangeable grip backs, S and L
- Two 15-round magazines
- User manual
- Witness to an empty room
- FN Herstal badge
- Enlarged rear slide plate
- ABS case

Maximum ergonomics and total control

From the moment you pick it up, the **FN HIPER®** inspires confidence. Its textured **polymer frame** ensures a firm grip, even in dynamic conditions. Interchangeable backstraps (S, M (pre-installed), L) allow for a perfect fit to the shooter's hand. The result: natural control, instinctive alignment, and faster shot tracking.

Fully ambidextrous controls

The slide stop and magazine release button are fully ambidextrous and independent. Magazine changes can be performed without altering the grip - a real advantage in **sport shooting** . The side indicators on the polymer magazine allow for immediate visual monitoring of the remaining capacity.

Optimized slide and barrel

The **slide,** made of anodized aluminum and aircraft-grade steel, features front and rear serrations for easy handling. The external extractor also serves as a loaded chamber indicator. The 10 cm **barrel** boasts a polished chamber and feed ramp, as well as a low pivot point to minimize muzzle rise during firing. The 1:10" RH twist rate enhances the stability of 9x19 mm projectiles.

Safe dismantling and simplified maintenance

Disassembly does not require activating the trigger, enhancing safety during maintenance operations. This technical detail demonstrates the thought put into combining safety and practicality by **FN Herstal** engineers.

Equipment and customization

Equipped with an integrated **Picatinny rail** , the pistol accepts various compatible accessories. It comes with two 15-round magazines, two additional backstraps (S and L), an ABS case, a manual, an empty chamber indicator, and an FN badge.

FAQ
