- Two 15-round magazines
- User manual
- Witness to an empty room
- FN Herstal badge
- Enlarged rear slide plate
- ABS case
- MRD mounting kit

Patented MRD system

The **MRD** (Mini Red Dot) version is designed to accommodate a standard **red dot sight** thanks to its dedicated interface and included mounting kit. Alignment is quick and natural, promoting more

intuitive target acquisition. In practice, this changes the aiming dynamics, especially in dynamic **target shooting** .

Ergonomics and ambidextrous controls

The textured polymer frame ensures a firm and consistent grip. Interchangeable backstraps (S, M (mounted), L) allow the weapon to be adapted to any hand size. The slide stop and magazine release button are fully ambidextrous and independent, guaranteeing smooth operation for both right- and left-handed shooters.

Optimized barrel and slide

The 10 cm **barrel** features a polished chamber and feed ramp, with a low bore axis to minimize muzzle rise. The **slide** has front and rear serrations for easier handling. The external extractor also serves as a loaded chamber indicator.

Safety and simplified maintenance

Disassembly is performed without applying pressure to the trigger, enhancing safety during maintenance. The integrated **Picatinny** rail allows for the mounting of compatible accessories. Supplied with two 15-round magazines, additional S and L backstraps, MRD kit, ABS case, and original accessories.

FAQ

Does the FN HIPER® MRD come with the optical mounting kit?

Yes, the MRD version comes with its mounting kit allowing the installation of a compatible mini red dot sight.
