Laminated rifle with thumbhole stock, 1/2x20 UNF threaded barrel.

The **Browning X-Bolt Xpert Thumbhole .17 HMR** is a manually operated repeating rifle with a laminated thumbhole stock and a 1/2x20 UNF threaded barrel, designed for small caliber accuracy.

- **Barrel length:** 46 cm (457 mm)
- **Thread:** 1/2x20 UNF
- **No scratches:** 1:9"
- **Capacity:** 8+1 shots
- **Charger:** Removable rotating (type 10/22® compatible)
- **Trigger:** Adjustable MOA
- **Stock:** Brown laminated satin finish, thumbhole
- **Safety:** Manual, 2 positions
- Glasses not included

Adjustable MOA trigger: the triple zero principle

The **MOA** Rimfire trigger system features a three-lever design that guarantees zero dead travel, zero drag, and zero overtravel. The break is crisp, clean, and extremely fast. The trigger pull weight is adjustable to tailor the feel to the shooter's profile-a real advantage for fully exploiting the potential of the **.17 HMR**.

1/2x20 UNF threaded barrel

The 46cm barrel is threaded **1/2x20 UNF** for mounting a compatible suppressor. A ring protects the threads when not in use. The chamfered muzzle preserves the rifling, helping to maintain consistent accuracy over multiple sessions.

Ergonomic laminated thumbhole stock

The **laminated stock with a satin finish in brown** offers rigidity and stability. Its thumbhole design ensures a natural dominant hand position and excellent weapon control. The adjustable cheek piece allows for optimal alignment with rail-mounted optics. The overall package remains balanced and comfortable on the shoulder.

Rotary charger and ambidextrous controls

The removable rotary magazine (8+1 rounds) is compatible with the 10/22® models. The ambidextrous release system, accessible via side or bottom tabs, allows for smooth operation. The magazine falls naturally into the hand - a practical detail at the range.

Optically ready configuration

Lacking iron sights (No Sight), this version is designed to be fitted with a scope suitable for **precision shooting** with small calibers. The steel receiver ensures rigidity and durability.

FAQ

What is the charger's capacity?

The rifle comes with a removable rotary magazine with a maximum capacity of 8 cartridges, plus one in the chamber (8+1).

Is the cannon ready to receive a sound moderator?

Yes, the barrel is threaded 1/2x20 UNF and protected by a removable ring when the thread is not in use.

What is the regulatory category in France?

The .17 HMR caliber manually operated repeating rifle is classified in category C. Its acquisition is subject to declaration in accordance with current French regulations.
