Its realistic and powerful sound effectively attracts mallards.

The **Helen Baud Mallard Call AC615** is a **triple-bladed call** designed to faithfully reproduce the call of the **mallard duck** . Compact, robust, and precise, it offers excellent sound projection for **waterfowl hunting** .

- **Type:** Triple-bladed mallard call
- **Color:** Black / White
- **Length:** 11.5 cm
- **Diameter:** 2.5 cm
- **Weight:** 53 g
- **Composition:** Polycarbonate (PC), polyamide 30% fiber, aluminum ring
- **Packaging:** Individual blister pack (15 x 14.5 x 4 cm)

Accurate sound imitation of the mallard

In wetlands or marshes, the accuracy of the sound makes all the difference. Thanks to its **triple-bladed** design, this **mallard call** produces rich, deep, and adjustable sounds. From quacking and callbacks to attraction calls, the wide range of sounds adapts to different approaches.

Sturdy and durable construction

Made from **polycarbonate** and **fiber-reinforced polyamide** , the body offers excellent resistance to impacts and moisture. The **aluminum ring** reinforces the entire structure while ensuring good stability of the internal components. The result: a reliable bird call, even in wet and cold conditions.

Compact size and natural grip

Measuring **11.5 cm** in length and **2.5 cm** in diameter, it fits easily in the hand or slips into a jacket pocket. Its light weight (53 g) allows for discreet and comfortable transport when moving around the station.

An essential tool for waterfowl hunting

Designed for **mallard hunting** , this duck call is suitable for both experienced hunters and those looking to refine their calling technique. When mastered, it becomes a valuable tool for maximizing the attractiveness of a duck blind.

FAQ

What is the purpose of a triple-bladed bird call?

A triple-bladed call produces a richer, more powerful sound with more nuances, making it easier to realistically imitate the mallard's call.

Is this model suitable for wet conditions?

Yes, its construction in polycarbonate and reinforced polyamide, as well as its aluminum ring, ensure good resistance to humidity and climatic variations.

How do I maintain this bird call?

It is advisable to disassemble and dry it after use in a humid environment, then clean the slats to preserve the sound quality over time.
