Practical textile protection for safely transporting your disassembled long guns.

- **Design:** 2 separate parts (stock + barrels)
- **Stock length:** 55 cm; **Barrel length:** 86 cm
- **Use:** Transport and storage in a safe or strongbox

The **Spika 2-Piece Gun Sock** effectively protects your firearm from scratches, dust, and moisture during transport or storage. Its two-part system allows you to cover the stock and barrels separately for complete protection.

- **Type:** Protective sock for long gun
- **Material:** Silicone-treated stretch knit fabric
- **Durability:** Protection against scratches, light impacts and dust
- **Treatment: Moisture-resistant** fabric
- **Compatibility:** Rifles and shotguns

Smart textile protection for your long guns

When a firearm is transported or stored, **scratches** , **dust** , or **moisture** can quickly damage its condition. The **Spika 2-Piece Firearm Sock** was designed to address this problem with a simple, effective, and durable solution. Thanks to its silicone-treated stretch fabric, it gently wraps around the firearm and acts as a true protective barrier.

Two-piece design for complete protection

Its unique feature lies in its two-part design: one sleeve for the **receiver and stock** , and a second for the **barrels** . This configuration protects the different parts of the firearm while preventing friction between them during transport. In practice, this is particularly useful for disassembled shotguns or firearms stored in a safe.

Silicone-treated and breathable fabric

The stretch knit fabric used provides a natural fit around the weapon. It is also **treated with silicone** , which helps limit **corrosion** and **oxidation** . Its breathable structure reduces moisture buildup-an essential factor during extended storage in a **gun safe** or **cabinet** .

A practical accessory for transport and storage

Whether for protecting a firearm while traveling, on a hunting trip, or simply in a safe at home, this accessory provides a simple and effective solution. Its flexible fabric takes up very little space and

installs quickly, while guaranteeing reliable protection.

- **Fabric:** High-strength stretch mesh
- **Treatment:** Anti-corrosion silicone protection
- **Breathability:** Limits moisture buildup
- **Design: SPIKA** logo with deer motif
- **Transportation:** Reduction of friction between weapon parts

FAQ

Is this sock compatible with all long guns?

It is especially suited to break-action hunting rifles or carbine or any other weapon that can be disassembled into two parts.

Does the sock protect against moisture?

Yes, the fabric is silicone-treated and moisture-resistant. This limits condensation and helps prevent corrosion during storage.

Can this protection be used in a safe?

Absolutely. It is particularly suitable for storage in a safe or vault, where it protects the weapon from friction, dust and humidity.
