- **Magwell:** Removable magazine well extender
- **Magazines:** 2 x 18-round magazines compatible with P226
- **Optics: Holosun HS407C** 2 MOA red dot
- **Optical battery:** CR1632
- **Protection rating:** IP67

A modern evolution of the PX-9

The **Tisas PX-9 Night Stalker SF Gen3** represents an optimized version of the PX-9 Duty. Designed to offer smooth handling and excellent shooting stability, it combines a lightweight

polymer frame with a machined and ported steel slide.

These openings on the slide reduce inertia during the firing cycle. In practice, the bolt returns to battery more quickly and muzzle rise is limited, which facilitates rapid fire and improves overall weapon control.

Threaded barrel and optic ready configuration

The barrel of the **Tisas PX-9 Night Stalker SF Gen3** is equipped with a **1/2x28** thread, a widely used standard on modern firearms. This configuration allows for the installation of compatible accessories according to the shooter's needs.

The slide is also **optic-ready** and compatible with RMR standard micro **red dot** sights. The high sights with **fiber optic front sights** allow for **co-witness** aiming when optics are mounted, thus ensuring effective redundancy.

Holosun HS407C for fast acquisition

This version comes with a **Holosun HS407C** , a micro reflex sight renowned for its robustness and exceptional battery life. Its **2 MOA red dot** reticle allows for rapid target acquisition while maintaining precision suitable for sport shooting disciplines.

Thanks to **Shake Awake** technology, the optic activates automatically when the weapon is moved, thus optimizing the operating time of up to **50,000 hours** .

- **Reticle:** 2 MOA red dot
- **Dimensions:** 46 x 30 x 30 mm
- **Weight:** 41 g
- **Material:** 7075 aluminum
- **Brightness levels:** 12 (10 day / 2 night)
- **Operating temperature:** -10°C to 50°C

Ergonomics adaptable to the shooter

The **Tisas PX-9 Night Stalker** stands out for its modularity. It comes with **three sets of backstraps** and side plates allowing the grip width to be adjusted to suit the shooter's physique.

The **removable magwell** makes magazine insertion easier and improves grip during handling. The serrations on the front and rear of the slide ensure safe and rapid operation.

Security and visual control

The pistol incorporates several indicators allowing for quick monitoring of the weapon's status. At the rear of the slide, a **red indicator** visually and tactilely signals that the firing pin is cocked.

The extractor also features a red indicator that pops up when a cartridge is chambered, providing an immediate check of the weapon's status.

FAQ

Is this pistol compatible with RMR optics?

Yes. The Tisas PX-9 Night Stalker SF Gen3 is optic ready and compatible with RMR standard micro red dot sights. The Holosun HS407C is included with this version.

Are the magazines specific to the PX-9?

The PX-9 uses 18-round magazines compatible with P226 type models, which facilitates the availability of accessories.

What are the purchasing conditions in France?

The 9x19 mm caliber pistol is classified in category B. Its acquisition requires prefectural authorization and must be carried out through an approved gunsmith.
