Automatically cleans silencers and dissolves combustion residues without odor.

Ballistol Silent Cleaner 500ml is a solution specially formulated to effectively remove **combustion residue** and **soot** from **sound moderators** . Its acid-free formula, containing surfactants, automatically dissolves deposits while respecting the materials and providing protection against corrosion.

- **Type:** Muffler cleaner
- **Capacity:** 500 ml
- **Action:** Automatic dissolution of combustion residues
- **Formula:** Acid-free and odorless
- **Composition:** with surfactants
- **Protection:** Integrated anti-corrosion additives
- **Indicator:** color change during action
- **Compatibility:** removable and non-removable silencers

Effective cleaning of the mufflers

Ballistol Silent Cleaner was developed to automatically dissolve **combustion residue** and **soot** accumulated in **sound moderators** . Thanks to its formula containing **surfactants** , it acts directly on powder deposits and neutralizes them without the need for special tools.

The product penetrates deep into the internal chambers of the silencer and gradually dissolves the residues, thus facilitating their removal during rinsing.

Material-friendly formula

Its **acid-free** and **odorless** formula is compatible with the materials used in sound moderators. It can be used on various types of silencers, including detachable models.

Anti-corrosion additives are incorporated to protect metal surfaces against oxidation after cleaning.

Simple and automatic operation

Using the product is simple: just close one end of the silencer and fill it completely with the cleaner. After a minimum of **2 hours** , the residue will dissolve automatically.

For heavily soiled silencers, the product can be slightly heated (approximately **40°C**) and left to act for a longer period to optimize cleaning.

- **Recommended contact time:** minimum 2 hours
- **Possible temperature:** approximately 40°C for intensive cleaning
- **Rinse:** clean water after treatment
- **Indicator:** color change during dissolution

Versatility of use

The cleaner can also be used by immersion when the silencer cannot be plugged. Disassembled parts can be immersed in the product and then brushed after the chemical reaction to remove any remaining residue.

This solution allows for effective maintenance of the silencers, helping to maintain their performance and longevity.

FAQ

Does this product require mechanical brushing?

No. Ballistol cleaner works automatically to dissolve combustion residues. A simple rinse with water is sufficient in most cases.

Can it be used on a removable silencer?

Yes. Disassembled parts can be immersed in the product to dissolve residues, then cleaned with water and a brush if necessary.

Does the product attack the materials?

No. Its formula is acid-free and designed to be gentle on materials. However, it is advisable to test for compatibility on sensitive or painted surfaces before use.
