Extreme power and ultra-concentrated shot pattern for waterfowl hunting.

Mary Arm Xtrem 40 12/76 gauge cartridges are designed for long-range waterfowl hunting. Featuring Sphero Tungsten shot and a velocity exceeding 400 m/s, they deliver a dense pattern and exceptional penetration.

- **Caliber:** 12
- **Socket length:** 76 mm
- **Load:** 40 g
- **Type of stuffing:** skirted stuffing
- **Shot:** Sphero Tungsten
- **Lead number:** No. 4 or No. 6
- **Speed:** over 400 m/s
- **Base height:** 20 mm
- **Packaging:** box of 10 cartridges
- **Compatibility:** 76mm or 89mm chambered shotguns proofed to Steel Shot 1320 bar

A cartridge designed for the demanding conditions of the gabion

Developed for the most demanding waterfowl hunters, this ammunition stands out for its exceptional ballistics. Its design promotes **highly concentrated shot patterns** and a high velocity exceeding **400 m/s**. In the field, this translates into a flat trajectory and remarkable effectiveness at long range.

Sphero High-Performance Tungsten Shot

The cartridge uses **Sphero Tungsten shot**, known for its superior density and consistent manufacturing. This type of shot improves energy retention at long range and promotes **effective penetration**. The result: remarkable ballistic performance for waterfowl hunting.

Dense spray pattern and ballistic stability

The **wad with a skirt** plays a crucial role in the quality of the shot pattern. It provides excellent protection for the shot during firing and promotes even dispersion. The impacts remain grouped, which improves the consistency and accuracy of the shot.

Suitable for modern, proven Steel Shot rifles

This ammunition is compatible with shotguns chambered for **12/76** or **12/89** shells that have passed the **Steel Shot 1320 bar** proof test. This compatibility allows it to be used with modern firearms designed for waterfowl hunting, particularly in wet or marshy environments.

Optimized performance for long-range shooting

Thanks to its **40-gram** load and high velocity, this cartridge maintains excellent effectiveness between **50 and 65 meters** . It thus meets the needs of waterfowl hunters looking for ammunition capable of maintaining power and consistency on more technical shots.

FAQ

What type of hunting are these cartridges designed for?

Xtrem 40 cartridges are designed for waterfowl hunting, particularly in gabions or wetlands where shots can be taken at medium or long range.

Which rifles can these cartridges be used with?

They are designed for 12 gauge shotguns chambered for 76 mm or 89 mm and Steel Shot 1320 bar proofed.

What is special about Sphero Tungsten shot?

Sphero Tungsten shot has a high density and regular shape, which improves penetration and energy conservation at long range.
