Heavy-duty cleaning patches for .75 caliber black powder firearms.

The **Daive Pedersoli Set of 100 .75 Caliber Patches** is designed for the effective maintenance of **black powder firearms** and large-caliber historical firearms. Made of absorbent textile **0.31 mm thick**, these patches allow for precise and regular cleaning of the barrel.

- **Brand:** Davide Pedersoli
- **Caliber:** .75
- **Diameter:** 42 mm
- **Thickness:** 0.31 mm
- **Material:** absorbent textile
- **Use:** cleaning and maintenance of the barrel
- **Packaging:** pack of 100 patches

A patch designed for .75 caliber

Specifically sized for **.75 caliber** firearms, these patches have a diameter of **42 mm**. This size allows for optimal contact with the barrel walls, improving cleaning efficiency when using a cleaning rod.

A thickness suitable for cleaning

With a **thickness of 0.31 mm**, these patches offer an excellent compromise between resistance and absorption. They effectively retain cleaning solvents or oils while maintaining their hold during passage through the barrel.

Essential for the maintenance of black powder firearms

Regular maintenance is essential to preserve the performance and longevity of black powder firearms. Used with a **cleaning rod** and a suitable product, these patches remove powder residue, deposits, and impurities after each shooting session.

Convenient packaging for regular shooting

Offered in **packs of 100 patches**, they provide an economical and practical solution for the regular maintenance of your firearm. An ideal format for sport shooters or historical shooting enthusiasts.

FAQ

What are weapon cleaning patches used for?

They allow you to clean the inside of the barrel by removing firing residue, powder and impurities using a cleaning rod.

Are these patches suitable for black powder weapons?

Yes. Their absorbent material and size are perfectly suited for the maintenance of historical weapons and .75 caliber black powder weapons.

Can these patches be used with cleaning solvents?

Yes. They are designed to effectively absorb solvents and maintenance oils used for cleaning barrels.
