A robust and smooth ambidextrous lever, designed for quick and comfortable handling.

- **Material:** 7075-T6 aluminum
- **Finish:** Hard anodizing Type III
- **Design:** Ambidextrous with oversized levers
- **Width:** 7 cm
- **Weight:** 28 g
- **Function:** Integrated gas reduction (Mod2)
- **Ergonomics:** machined texture for better grip
- **Installation:** direct installation without a gunsmith

Fast and intuitive ambidextrous handling

The **Breek Arms Warhammer Mod2** stands out with its widened and recessed levers, easily accessible from both sides. Even with thick gloves, the grip remains natural. In practice, this allows for quick, smooth, and above all, reliable manipulation in all situations.

Compatibility with large lenses

Set-back latches provide more space around the optic. This is a real advantage on modern setups equipped with large scopes or red dot sights, preventing any interference when cocking the rifle.

Improved throttle reduction - Mod2 version

This Mod2 version incorporates concrete improvements to limit gas blowback. Cutouts on the top and bottom of the body redirect gases outwards, while the raised rear shelf acts as an additional barrier. The result: a more comfortable shot, especially appreciated when used with a moderator.

Sturdy and lightweight construction

Machined entirely from **7075-T6** aluminum, including the levers, this charging handle combines strength and lightness. Weighing less than 30 grams, it doesn't add bulk to the platform while offering excellent wear resistance.

Clean and functional design

Despite its oversized levers, the **Warhammer Mod2** maintains a relatively discreet profile. It integrates easily into all types of configurations, from simple builds to more technical setups, without compromising on aesthetics or functionality.

Additional features

- **Use:** sport shooting, training, configurations with optics
- **Ease of use:** can be operated with one hand
- **Installation:** Direct replacement for original part
- **Positioning:** accessible ergonomic upgrade

FAQ

Is this model compatible with all AR-15 platforms?

Yes, it is compatible with all AR-15 and M16 rifles that meet the Mil-Spec standard.

What is the advantage of the Mod2 version?

The Mod2 version improves gas management thanks to specific cutouts and a raised rear shelf, limiting the blowback towards the face.

Can it be installed by oneself?

Yes, the installation is simple and requires no special tools or intervention from a gunsmith.
