Lightweight and robust airsoft silencer for increased discretion during gameplay.

The **SOCOM SL Polymer Black Silent Tactical Lancer** combines a **polymer** body with a steel thread for excellent durability and **optimal discretion** in airsoft.

- **Body material:** Plastic
- **Thread:** steel
- **Finish:** black
- **Accessory:** Removable inner barrel extension included

- **Thread pitch:** 14 mm CCW (counter-clockwise)
- **Length:** 195 mm

Enhanced discretion in the field

In a game situation, this **airsoft silencer** reduces the replica's sound signature. You quickly notice an increase in **stealth** , especially during infiltration or in confined spaces. It's a simple accessory, but one that clearly changes your tactical approach.

Polymer structure and no steel screws

The choice of a **polymer body** allows for excellent lightness, preventing the replica from becoming unbalanced. The more durable **steel threading** ensures reliable assembly and optimal alignment, even after numerous handling.

Universal compatibility 14 mm CCW

Thanks to its **14mm counter-clockwise** thread, this model fits a wide range of airsoft replicas. Installation is quick and secure, requiring no special adjustments in most configurations.

Removable inner barrel extension

The inclusion of an **inner barrel extension** provides a welcome bonus. It helps stabilize the ball as it exits the barrel, while remaining removable to adapt to each player's preferences or the

constraints of the playing field.

FAQ

Is this silencer compatible with all replicas?

It is compatible with replicas equipped with a 14mm CCW thread, a widely used standard in airsoft.

Does it actually provide a real gain in discretion?

Yes, it reduces the noise of the air exiting the exhaust, making the replica more discreet, especially in enclosed environments.

Is the internal extension mandatory?

No, it is removable and can be used or removed as needed and configured.
