A rifle designed for recreational shooting

With its **19.9 joules** of power, this **air rifle** is ideal for **precision target shooting** as well as **plinking** . Its **break-barrel** operation offers great ease of use: no need for CO? cartridges or PCP refills, a simple manual cocking allows for rapid-fire action.

Canon Storm Barrel: precision and style

The **Storm Barrel** combines a rifled steel barrel with a particularly robust polymer casing. Its muzzle brake facilitates handling during cocking while providing a modern look inspired by tactical weapons. This design also helps protect the barrel during outdoor use.

Intuitive aiming

The **fiber optic** sights, consisting of an adjustable rear sight and a tunneled front sight, ensure rapid target acquisition, even in low light conditions. They allow you to fully exploit the natural accuracy of the rifled barrel.

A stock resistant to exclusive camouflage

The synthetic stock features a design inspired by rocky mountain landscapes. Beyond its unique aesthetic, it is highly resistant to moisture, scratches, and outdoor use. The rubber butt plate enhances comfort during extended shooting sessions.

A simple and economical mechanism

The spring-powered system is valued for its reliability and autonomy. All you need are **4.5 mm** caliber pellets, the most common caliber in gun shops, to enjoy a shooting session without an external power supply or additional consumables.

FAQ

Is this rifle available for purchase without a license?

Yes. With a power of 19.9 joules, it is classified in category D in France and can be acquired by any adult upon presentation of an identity document.

Should CO? or compressed air be used?

No. This rifle operates using a spring-powered mechanism with a break-barrel action. No gas or air tank is required.

What projectiles should be used?

She exclusively uses 4.5 mm (.177) caliber diabolo pellets, available in most gun shops and specialty stores.
