World-class reference bullets for precision shooting.

Sierra MatchKing bullets are **high-precision bullets** designed for **sport shooting** and long-distance competition.

- **Type:** HPBT (Hollow Point Boat Tail) warheads
- **Use:** precision shooting, competition
- **Calibers:** wide range from .22 to .30 and more
- **Profile:** High-performance aerodynamics
- **Manufacturing:** strict tolerances
- **Compatibility:** Handguns and rifles

Consult the reloadable calibers according to the diameters of Sierra bullets.

An absolute benchmark in precision shooting

MatchKing bullets have been used for decades by the most demanding competitive shooters. Their reputation is well-deserved: they have contributed to numerous national and international records. In practice, this translates into impressive consistency, shot after shot.

HPBT profile: stability and flat trajectory

The **Hollow Point Boat Tail** design ensures excellent flight stability. The **boat tail** base reduces drag, while the hollow tip optimizes balance. The result: a flatter flight path and improved resistance to crosswinds.

Consistent performance

Each bullet is manufactured to extremely tight tolerances. This guarantees remarkable consistency, essential for **long-range shooting** and precision disciplines. It's typically the choice of discerning reloaders.

Versatility in rifle and handgun use

Available in many calibers, **Sierra MatchKing** bullets are used in both rifles and handguns, particularly in certain metallic silhouette or long-range shooting disciplines.

Note regarding usage

These bullets are designed primarily for precision. They are **not optimized for hunting** , as their design does not guarantee controlled expansion. For that purpose, other Sierra bullet lines are more suitable.

Additional features

- **Manufacturing:** Match quality
- **Use:** reloading
- **Applications:** sport shooting, competition

FAQ

Are these bullets suitable for hunting?

No, they are designed for precision shooting and competition, not for controlled expansion in hunting.

What calibers are available?

The range covers many calibers, from .22 to .30 and beyond depending on the reference.

Why choose MatchKing?

For their exceptional precision, consistency and recognized performance in competition.
