A montage dedicated to Remington rifles

The **Scalarworks SYNC/04** is specifically designed for **Remington 870, 1100, and 11-87** rifles with factory-drilled barrels. Its direct integration ensures a low, stable mount that is perfectly aligned

with the rifle's axis.

Watertight platform without intermediate plate

Thanks to its **watertight** design, this assembly does not require an additional sealing plate. The result: fewer parts, less play, and increased reliability, even in wet or harsh conditions.

Extended compatibility with RMR red dots

The **SYNC/04** is compatible with a wide range of optics conforming to the **Trijicon RMR** standard and derivatives, including **SROs** . An ideal solution for efficiently modernizing a proven platform.

Simplified installation and bundled solution

Scalarworks Optic Bundle configurations allow for a plug-and-play installation, with factory-tested and mounted optics. For undrilled camera bodies, a dedicated **Drill & Tap** guide is also available.

Robust construction and minimal weight

Made from **7075-T6 aluminum** with **4140H steel** components, this mount offers excellent durability. Weighing only **22g** , it remains extremely discreet while ensuring a reliable hold.

FAQ

Is this mount compatible with all Remington rifles?

It is compatible with models 870, 1100 and 11-87 which have the original 4-hole drilling.

Is a sealing plate required for the installation?

No, the assembly is designed to be watertight without an additional plate.

Can this setup be installed on a case that is not drilled?

Yes, with the use of the appropriate Scalarworks Drill & Tap guide.
