Ultra-light red dot mount specifically designed for Benelli rifles.

The **Scalarworks SYNC/01** is a red dot mount designed for **Benelli** rifles, offering low-profile, robust, and perfectly aligned integration.

- **Weapon compatibility:** Benelli M2, M3, M4, M1014, Vinci, Super Black Eagle II & III, Stoeger M3000
- **Co-witness:** Lower 1/10 depending on version
- **Materials:** 7075-T6 Aluminum / 4140H Steel
- **Finish:** Type III Black Anodizing / Nitride Flash
- **Weight:** 18 to 22 g depending on the version
- **Origin:** United States

Box contents

- **Media:** Scalarworks® SYNC/01™
- **Screws:**
  - (4) #8-40 screw with nylon patch
- **Tools :**
  - Scalarworks® T10 Torx Bit

A build dedicated to Benelli tactical rifles

The **Scalarworks SYNC/01** is designed to integrate directly onto **Benelli** rifles (M2, M3, M4, M1014, Vinci, Super Black Eagle...). Its low profile allows the **red dot** to be positioned as close as possible to the barrel axis, providing a natural and rapid aiming experience.

Wide selection of optical interfaces

Available in five versions - **RMR** , **Aimpoint Micro** , **ACRO** , **DeltaPoint Pro** , and **Holosun 509T** - this mount covers most market standards. This allows for precise configuration adjustments to suit the chosen lens.

Ultra-lightweight construction without compromise

Machined from a block of **7075-T6 aluminum** , the **SYNC/01** offers an excellent strength-to-weight ratio. Weighing only **18 to 22 g** , it ranks among the lightest assemblies on the market while maintaining remarkable strength.

Waterproof platform and optimized design

The **RMR** version incorporates a screw-based sealing system with an O-ring, eliminating the need for an intermediate plate. The result: simplified installation, fewer parts, and improved reliability in harsh conditions.

Ergonomics and natural co-witness

The low positioning allows for a **co-witness lower of 1/10** (depending on the version), providing a smooth transition between mechanical and optical sights. In practice, this improves speed and accuracy in dynamic shooting situations.

FAQ

Which version should I choose based on my red dot?

Each version corresponds to a specific footprint: RMR, ACRO, Aimpoint Micro, DeltaPoint Pro or Holosun 509T.

Is this assembly compatible with all Benelli models?

It is compatible with the main Benelli tactical 12 gauge models as well as the Stoeger M3000.

Is the assembly waterproof?

Yes, especially the RMR version which incorporates a sealing system without an additional plate.
