- **Handle:** Hogue rubber

- **Caliber:** .44 Remington Magnum
- **Capacity:** 6 shots
- **Barrel length:** 6"
- **Total length:** 279 mm
- **Weight:** 1.31 kg

A revolutionary architecture for shooting

This revolver immediately stands out due to its **low barrel axis** . In practice, firing is done from the bottom chamber of the cylinder, aligning the trigger pull more closely with the hand. The result: **more linear recoil** , less muzzle rise... and a very clear feeling of control, even in **.44 Magnum** .

Redesigned ergonomics and secure handling

The **Rhino 60DS** features a wider frame and **integrated finger stops** . In practice, the grip is firm, natural, and almost instinctive. The **Hogue rubber** grip effectively absorbs vibrations and improves comfort during extended sessions.

Precise and adjustable aiming

It features an **adjustable rear sight** for windage and elevation, coupled with a clearly visible **fiber optic** . This allows for rapid target acquisition and fine adjustments depending on shooting conditions. A real advantage for **precision shooting** at medium range.

Robust construction and premium finish

The combination of an **aircraft-grade alloy frame** and a **steel barrel** ensures strength and durability. The **Gold PVD** finish, beyond its distinctive appearance, provides excellent resistance to wear and corrosion.

Additional features

- **Safety features:** cylinder lock, rotation lock, hammer lock
- **Extraction:** manual
- **Power supply:** manual barrel
- **Included:** Rhino sticker, user manual

FAQ

What category is this revolver?

This .44 Magnum caliber revolver is classified in category B, subject to prefectural authorization.

What is the advantage of the low barrel axis?

It helps to reduce muzzle rise when firing, thus improving control and speed of return to target.

Is this model suitable for sport shooting?

Yes, it is particularly appreciated for sport shooting thanks to its accuracy, ergonomics and recoil management.
