A modern GBB replica with a strong military look, designed for realism and handling.

The **APFG XM7 SPEAR MCX GBB** is a gas-powered airsoft replica with a strong NGSW style, designed to offer realistic operation, convincing simulated recoil, and excellent ergonomics in the field.

- **System:** simulated recoil, adjustable HOP-UP
- **Energy:** 12 kg gas / Top Gas / Green Gas
- **Caliber:** 6mm BB
- **Capacity:** 22 shots
- **Initial velocity:** approximately 100 m/s, or 330 FPS with a 0.20g BB
- **Firing mode:** safe / semi-automatic / automatic
- **Materials:** aluminum alloy, steel, metal, reinforced plastic, rubber
- **External barrel:** 12.7 inches, aluminum alloy
- **Handguard:** CNC-machined M-LOK modular
- **Finish:** all sand color
- **Charger:** MCX SPEAR type gas magazine included

- **Length:** 830 to 880 mm
- **Weight:** 3260 g

A platform designed for immersive gaming

On the field, you immediately appreciate a replica with a modern design, stable on the shoulder, and pleasant to handle. The **APFG XM7 SPEAR MCX GBB** adopts the aesthetics of recent SPEAR-type platforms with a sleek silhouette, a very contemporary sand-colored finish, and a visual presence that doesn't go unnoticed. For a shop or retailer, it's exactly the kind of model that catches the eye from the moment you pick it up.

Realistic blowback and shooting sensations

The GBB system with simulated recoil offers a more realistic and immersive experience than a standard electric platform. With each shot, the mechanics contribute to the feel, enhancing the

sense of realism and the enjoyment of using it. The internal bolt mechanism, combined with steel components like the bolt and hammer, clearly reflects this: this is a replica focused on user experience, not just a pretty shell.

Quick HOP-UP adjustment

One of the real strengths of this setup is the quick hop-up adjustment without disassembly. In practice, this makes adjustments easier between games or depending on the BB weight used. It's simpler, smoother, and above all, more relevant for players who want to maintain a clean trajectory without wasting time making lengthy adjustments to the replica.

Ambidextrous ergonomics and modern handling

This base was designed for intuitive handling. The ambidextrous bolt handle, magazine release controls on both sides, ambidextrous fire selectors, and tactical charging handle allow for a natural grip, whether you're right- or left-handed. The left-side, SPEAR-style charging handle adds a distinctive touch and emphasizes the model's technical nature.

Robust construction and tactical finish

The blend of aluminum alloy, steel, metal, and reinforced polymers strikes an interesting balance between strength, realism, and ease of use. The CNC-machined M-LOK handguard contributes to overall rigidity while offering numerous customization options with compatible accessories. The steel flash hider and overall design further enhance the impression of seriousness in handling.

A scalable foundation for customization

This platform is also aimed at players who like to upgrade their setup. Its modular handguard facilitates the mounting of additional equipment, while the MCX fixed stock adapter and the sand-colored B5-style rear stock contribute to a cohesive, modern, and immediately usable configuration. The result is a replica that is as convincing on display as it is in action.

Additional information

- **Color:** Tan / Sand
- **Magazine compatibility:** VFC SR-25 GBB, SR-25 ECC, M110 SASS, SCAR-H MK17 GBB
- **Recommended internal lens:** approximately 330mm for the original configuration
- **Controls:** numerous ambidextrous controls
- **Stock:** B5 style, sand color
- **Package contents:** replica, charger, user manual
- **Supplier reference:** APFG-S-014TN

FAQ

Is this replica compatible with other GBB magazines?

Yes. This configuration is advertised as compatible with several VFC GBB magazines of the SR-25, SR-25 ECC, M110 SASS and SCAR-H MK17 type, which expands the equipment possibilities for users already equipped with these platforms.

What type of gas should be used with this replica?

It operates on Top Gas / Green Gas. This choice allows for a dynamic blowback cycle and consistent use with its GBB design, while remaining within the performance parameters announced by the manufacturer.

What are the purchasing conditions in France?

In France, the sale and provision of replicas covered by decree no. 99-240 are prohibited to minors, and the energy rating in joules must be indicated on the product, its packaging, and the

instruction manual. This information sheet is therefore intended for adults in the context of airsoft practice and specialized distribution.
