A compact and reliable lithium battery for demanding electronic devices.

The **ENERGIZER CR2 3V 800mAh Lithium Battery** is a high-performance **lithium battery** designed to efficiently power high-energy-consumption devices. Compact, lightweight, and reliable, it guarantees excellent battery life and a long shelf life.

- **Type:** CR2 lithium battery
- **Technology:** Lithium-manganese dioxide
- **Voltage:** 3V
- **Minimum capacity:** 800mAh
- **Dimensions:** 27 mm (h) × 15.6 mm (Ø)
- **Weight:** 11 g
- **Packaging:** Blister pack x1
- **Operating temperature:** -40°C to +60°C

A lithium battery designed for demanding devices

The **ENERGIZER CR2 3V 800mAh Lithium Battery** delivers a stable and reliable power supply for devices requiring constant energy. Thanks to its **lithium-manganese dioxide** technology, it offers excellent lifespan both in use and storage.

In practice, this type of battery is particularly valued for sensitive electronic equipment where voltage stability is crucial. The CR2 is therefore found in many accessories requiring compactness and power.

Excellent resistance to extreme temperatures

This battery can operate in a wide range of climatic conditions, with a temperature range from -40°C to +60°C. This ensures reliable operation in both cold and hot environments.

In other words, it is perfectly suited for outdoor use, on-board equipment or devices used occasionally but which must remain immediately operational.

- **Minimum temperature:** -40°C
- **Maximum temperature:** +60°C

- **Battery life:** Long duration
- **Storage:** Excellent preservation

Compatible with many devices

The **CR2 3V** battery is widely used in various high-power electronic devices. Its compact size makes it easy to integrate into devices requiring power and minimal space.

It can be used in cameras, flashlights, remote controls, alarm systems, and certain computer accessories.

Recognized quality and reliability

Thanks to rigorous quality control and proven technology, the **ENERGIZER CR2** guarantees consistent performance. Its chemical stability helps limit capacity loss during prolonged storage.

This is typically the kind of battery you keep in your equipment to have a reliable power source when you need it.

FAQ

Which devices use a CR2 battery?

CR2 batteries are used in cameras, flashlights, alarm systems, remote controls and various compact electronic equipment.

What is the advantage of a lithium battery?

Lithium technology offers excellent autonomy, long storage life and better resistance to extreme temperatures.

Can this battery be stored for a long time?

Yes, lithium-manganese dioxide technology allows for very good energy conservation during storage.
