- **Rail:** Superior monolithic Picatinny
- **Controls:** Ambidextrous
- **System:** Quick spring change
- **Power supply:** Rechargeable battery included
- **Included accessories:** Battery and charger
- **Color:** Black

A long platform for greater stability

With its SD13 barrel and extended handguard, this **airsoft AEG** replica offers excellent stability during medium-range shooting. In gameplay, this translates to a more natural aiming experience and improved control during short bursts. Its design, inspired by modern tactical configurations, also enhances its visual realism.

High-performance Tight Bore 6.03 mm barrel

The **6.03 mm Tight Bore** inner barrel optimizes shot consistency and improves overall accuracy. Combined with the adjustable rotary hop-up, it allows for fine-tuning depending on the BBs used and playing conditions. This configuration is particularly appreciated for outdoor engagements or open areas.

Ambidextrous controls and modern ergonomics

This Gen 2 version features ambidextrous controls and a charging handle suitable for both right- and left-handed users. The functional bolt lock allows for quick access to the hop-up adjustment - a real advantage when you need to rapidly adjust your trajectory during a game.

Monolithic Picatinny rail for accessories

The monolithic top rail allows for the installation of numerous compatible accessories: red dot sight, compact scope, magnifier, or tactical modules. This modularity makes the replica particularly appealing to players wishing to customize their setup to suit their play style.

NSR stock designed for autonomy

The NSR adjustable stock accepts higher-capacity batteries, providing extended battery life in the field. With a battery and charger included, the replica can be used quickly upon receipt, simplifying setup for both new and experienced players.

Lightweight and durable construction

The billet-type polymer body reduces the overall weight of the platform while maintaining good robustness. This choice improves comfort during long sessions and limits fatigue during fast travel or extended play sessions.

- **Style:** Long SD SLR
- **Use:** Outdoor and multi-purpose terrain
- **Compatibility:** Picatinny Accessories
- **Handling:** Ambidextrous
- **Adjustment:** Rotary hop-up
- **Package:** Battery + charger included

FAQ

Is this replica suitable for outdoor play?

Yes, its Tight Bore barrel, original power and long format are perfectly suited to outdoor terrain and medium-range engagements.

Are the battery and charger included?

Yes, this replica comes with a rechargeable battery and charger for quick use upon receipt.

Can a scope be mounted on this replica?

Yes, the top Picatinny rail allows the installation of many accessories such as a red dot sight, a compact scope or folding sights.
