## A historic 6x scope designed for precision shooting at medium and long range.

The **Pedersoli Malcolm Rifle Scope 6x Gen 2** faithfully reproduces the aesthetics of 19th-century American rifle scopes while incorporating modern improvements for **precision shooting** at medium and long range.

- **Magnification:** 6x
- **Tube diameter:** 3/4" (19 mm)
- **Construction:** bronzed steel
- **Parallax adjustment:** from 10 yards to infinity
- **Micrometric adjustment:** windage and elevation
- **Front mounting:** micrometric wind correction
- **Extension provided:** 5"
- **Canon compatibility:** 28" to 30"
- **Use:** Middle & Long Range

### An optic inspired by historical precision shooting

Designed for **long-range shooting** enthusiasts and collectors of historical replicas, this scope faithfully reproduces the models manufactured by "Wm Malcolm Rifle Telescope" in Syracuse during the 19th century. From the moment you pick it up, you'll recognize the charm of period equipment, with its slim, blued steel tube and a silhouette instantly recognizable on a black powder rifle or a Sharps replica.

### Improved 2nd generation version

This new generation brings improvements that are particularly appreciated in the field. The **parallax adjustment** , now adjustable from 10 yards to infinity, significantly improves visual comfort and image sharpness depending on the shooting distance. In practice, this allows for more precise target alignment during medium- to long-range **target shooting** sessions.

Another important development: the front mount now features a **micrometric drift adjustment** . This fine wind correction offers greater precision during adjustments, particularly in variable external conditions.

**Designed for the Middle & Long Range**

The **Middle & Long Range** model features a rear mount with micrometric horizontal and vertical adjustments. This system allows for precise elevation and windage corrections, particularly useful for **long-range shooting** at metal silhouettes or paper targets.

The fixed 6x magnification provides a stable and clear image, ideal for precision shooting without unnecessarily adding weight to the rifle. It's exactly the kind of optic that historical competition enthusiasts appreciate for its balance between visual authenticity and modern performance.

**Tube compatibility and extensions**

The scope comes with a 5-inch extension, ideal for 28- to 30-inch barrels. For longer rifles, additional extensions are available to maintain a seamless and functional mount.

- **Extension provided:** 5"
- **Canon compatible:** 28" to 30"
- **Optional extension:** 7" for 32" barrel
- **Optional extension:** 9" for 34" barrel
- **Finish:** polished bronze steel
- **Style:** American historical reproduction
- **Distribution:** European exclusive Davide Pedersoli

**FAQ**

**Is this scope suitable for long-range shooting?**

Yes, this Middle & Long Range version has precise micrometric adjustments in windage and elevation, designed for precision shooting at medium and long range.

**Is parallax adjustment present on this generation?**

Yes, this second generation incorporates a parallax adjustment ranging from 10 yards to infinity in order to improve sharpness depending on the shooting distance.

**Can this scope be mounted on different barrel lengths?**

Yes, the included 5-inch extension fits 28- to 30-inch barrels. 7- and 9-inch extensions are available for 32- and 34-inch barrels.
