An expanding slug designed for powerful, long-range PCP rifles.

The **H&N Slug HP II** is a **hollow-point** projectile developed for long-range shooting with high-powered air guns.

- **Calibers available:** .218 (5.5 mm), .250 (6.35 mm), .301 (7.62 mm)
- **Type:** slug hollow point
- **Design:** wide flat surface with hollow tip
- **Material:** soft lead
- **Use:** long-range precision shooting
- **Compatibility:** High-power PCP air rifles

Designed for demanding shooters equipped with powerful PCP rifles, this slug focuses on flight stability and an effective reaction to impact, even at long range.

A modern hollow point design

The **H&N Slug HP II** features a new **hollow-point** design combined with a wide **flat section** . This combination improves energy transfer upon impact while maintaining excellent aerodynamic performance. The soft lead promotes rapid and consistent expansion, which is particularly beneficial on high-powered PCP rigs.

Designed for long-range shooting

With its optimized slug shape, this projectile offers greater stability than a standard diabolo pellet when used at medium and long ranges. In practice, this translates to a flatter trajectory, better velocity retention, and more consistent performance as distances increase. It's exactly the kind of ammunition you'd choose to get the most out of a modern PCP air rifle.

Developed with Air Hunter Gerhard

The **H&N Slug HP II** was developed in collaboration with **Air Hunter Gerhard** , a renowned specialist in **air rifles** and high-powered platforms. This hands-on approach is immediately apparent: projectile balance, target performance, and consistency have all been meticulously refined to meet the expectations of the most demanding shooters.

Multiple calibers for different platforms

Available in **.218 (5.5 mm)** , **.250 (6.35 mm)** , and **.301 (7.62 mm)** , this range allows you to match the projectile to the caliber of your firearm and the type of shooting you intend to do. The heavy versions take full advantage of high-powered PCP ammunition, offering excellent stability at long ranges.

- **Profile:** slug hollow point
- **Use:** sport shooting and long-distance precision shooting
- **Behavior:** high energy retention
- **Compatibility:** High-power PCP air guns
- **Design:** wide flat surface and soft lead

Ammunition specifically designed for powerful PCP airsoft guns

The **H&N Slug HP II** reveals its full potential with rifles capable of properly stabilizing a heavy slug. Its modern profile allows for excellent long-range accuracy while maintaining a very consistent shooting feel. In the field, this sense of stability and consistency is appreciated, even when conditions become more demanding.

FAQ

Is the H&N Slug HP II compatible with all air rifles?

This projectile is primarily designed for high-power PCP rifles capable of stabilizing heavy slugs over long distances.

What is the purpose of the hollow point?

The hollow point design promotes rapid energy transfer upon impact through optimized projectile expansion.

What calibers are available?

The H&N Slug HP II is available in .218 (5.5 mm), .250 (6.35 mm) and .301 (7.62 mm).
