### A heavy and accurate pellet designed for long-range shooting.

The **H&N Baracuda Hunter** is a **heavy hunting pellet** developed to offer high accuracy and strong penetration at long range.

- **Available calibers:** 4.5 mm, 5.5 mm and 6.35 mm
- **Type:** Hollow-headed lead
- **Profile:** smooth with deep cavity
- **Use:** long-range shooting and pest control
- **Behavior:** strong penetration and controlled expansion
- **Precision:** tight groupings

Developed for demanding shooters using high-performance air rifles, this projectile combines stability, penetration and precision in a format perfectly suited to long distances.

#### The Baracuda design reimaged for performance

The **H&N Baracuda Hunter** retains the proven Baracuda profile while adding a **deep hollow point** designed to improve impact performance. This evolution maintains the projectile's excellent aerodynamic qualities while promoting controlled deformation and efficient energy transfer.

#### Excellent long-distance stability

Thanks to its substantial weight and perfectly balanced profile, this pellet maintains a stable trajectory even at longer distances. This consistency is immediately noticeable in technical shooting: groupings remain tight and flight behavior is highly predictable. This is exactly what users of powerful PCP air rifles or high-end piston-driven rifles are looking for.

#### Strong penetration and controlled expansion

The **H&N Baracuda Hunter** was designed to deliver significant penetration depth while maintaining progressive expansion thanks to its frontal cavity. This combination provides an excellent balance of accuracy, effectiveness, and stability. The smooth profile also improves projectile consistency in a wide variety of barrel types.

#### Multiple calibers for different platforms

Available in **4.5 mm** , **5.5 mm** , and **6.35 mm** , this model can be used on various airgun configurations. The 4.5 mm version generally prioritizes speed and a flat trajectory, while the 5.5 mm and 6.35 mm versions offer more power and stability at longer ranges.

- **Projectile type:** hollow-point lead
- **Profile:** Smooth Barracuda
- **Operating distance:** medium and long range
- **Behavior:** high penetration and controlled expansion
- **Compatibility:** powerful air rifles

### **A popular choice for demanding shots**

The **H&N Baracuda Hunter** impresses with its consistency and ability to maintain precise groupings at distances where conventional pellets show their limitations. In practice, it inspires immediate confidence thanks to its balance in flight and its consistent performance from shot to shot.

### **FAQ**

#### **Is the H&N Baracuda Hunter suitable for long distances?**

Yes, this projectile was designed to offer excellent stability and tight groups at medium and long range.

#### **What is the advantage of the deep hollow head?**

The deep cavity promotes controlled expansion while maintaining a significant penetration capacity.

#### **What calibers are available?**

The H&N Baracuda Hunter is available in 4.5 mm, 5.5 mm and 6.35 mm.
