A fast and consistent 20/70 cartridge for shooting pigeons and small game.

The **Winchester ZZ Pigeon Gen 2 20/70 30g** is a high-performance **hunting cartridge** designed to offer speed, pattern density and consistency when shooting pigeons and small game.

- **Caliber:** 20/70
- **Load:** 30 g
- **Lead shot sizes available:** 5.5 and 7.5
- **Filling type:** skirt
- **Base height:** 12 mm
- **Projectile material:** lead
- **Speed:** 420 m/s

Developed for hunters seeking a fast and consistent cartridge, this 20 gauge ammunition combines shooting comfort, efficiency and excellent shot pattern quality.

A cartridge designed for pigeon shooting

The **Winchester ZZ Pigeon Gen 2 20/70 30g** was developed to meet the demands of pigeon and small game shooting. Its 30-gram load produces a dense and consistent shot pattern while maintaining excellent balance in a 20-gauge shotgun. In the field, the crisp trigger pull and consistent accuracy are immediately noticeable.

High speed for quick, responsive shots

With a claimed velocity of **420 m/s** , this ammunition offers particularly interesting dynamic performance on fast-moving birds and when shooting at targets on the move. This velocity helps reduce the lead required and improves responsiveness on flat trajectories. This is a significant advantage during sustained passes or instinctive shots.

Skirted wadding for a uniform sheaf

The presence of a **wad with a skirt** provides better protection for the shot at the start of the shot and contributes to a more consistent shot pattern. This design improves shot concentration at medium range while maintaining controlled dispersion depending on the choke used.

Two lead sizes depending on the use

Available in **#5.5** and **#7.5** shot sizes, this cartridge allows you to adapt the load to the game being hunted and the shooting distances. The #5.5 shot prioritizes energy and range, while the #7.5 shot provides a denser and faster pattern for close or intermediate shots.

- **Socket length:** 70 mm
- **Use:** pigeon and small game
- **Projectile type:** lead
- **Behavior:** high speed and consistent spray pattern
- **Compatibility:** 20 gauge shotguns chambered for 70mm

The comfort and efficiency of the 20 gauge

The 20-gauge is increasingly popular with hunters thanks to its excellent balance of handling, shooting comfort, and effectiveness. Combined with a high-performance load, the **Winchester ZZ Pigeon Gen 2** perfectly exploits the qualities of this modern and versatile caliber.

FAQ

Is this cartridge suitable for pigeon shooting?

Yes, the Winchester ZZ Pigeon Gen 2 was developed to offer a consistent pattern and high velocity, particularly suited to shooting pigeons and small game.

What is the difference between size 5.5 shot and size 7.5 shot?

No. 5.5 shot generally offers more energy and range, while No. 7.5 favors a denser pattern for short or medium range shots.

Is this ammunition compatible with all 20 gauge shotguns?

It is compatible with 20 gauge shotguns chambered in 70 mm.
