Inspired by the famous Webley Scott revolver

The **BORNER WS Black** replicates the distinctive lines of the famous **Webley Scott** , a historic handgun particularly prized for its aesthetics and mechanism. Its classic silhouette and black finish appeal to enthusiasts of classic replicas while offering a comfortable grip.

CO2 operation with 4.5 mm steel balls

This replica operates with a **12g CO2 cartridge** and uses exclusively **4.5mm steel BBs** . Its velocity reaches up to **120 m/s** with an energy of less than **3 joules** , offering performance suitable for recreational target shooting.

A realistic metal construction

Its predominantly metallic frame provides an excellent feel in the hand. Weighing approximately **1,030 g** , the revolver benefits from a natural balance that improves stability during firing and enhances the handling experience.

6-shot cylinder and double-action trigger

The **6-shot cylinder** contributes to the realism of this replica. Its **double-action** mechanism allows for smooth and intuitive use, while the absence of a blowback system promotes consistent CO2 consumption and better battery life.

A replica designed for recreational shooting

Thanks to its simple and robust design, the **BORNER WS** is an excellent choice for recreational shooting enthusiasts looking for a historically styled replica that is pleasant to use and easy to maintain.

FAQ

What type of ammunition does this revolver use?

The BORNER WS operates exclusively with 4.5 mm caliber steel BBs fed by a 12 gram CO2 cartridge.

Does the revolver have a blowback system?

No. This model does not have a Blowback system, which contributes to better CO2 cartridge autonomy and consistent operation.

Is this revolver intended for recreational shooting?

Yes. Its CO2 operation, 6-shot cylinder and power of less than 3 joules make it perfectly suited for recreational target shooting.
