A faithful replica of the historic Schofield

The **BORNER Schofield Worn** is directly inspired by the famous **Smith & Wesson Model 3 Schofield** , an iconic firearm from the late 19th century. Its aged finish gives it a unique character and an authentic look that will appeal to enthusiasts of historical firearms and realistic replicas.

CO2 powered and uses 4.5 mm steel balls

Powered by a **12g CO2** cartridge, this revolver develops a velocity of up to **120 m/s** with an energy of less than **3 joules** . It uses exclusively **4.5mm steel BBs** , perfectly suited to its operation.

Rifled barrel and adjustable sights

Equipped with an **18 cm rifled barrel** , the Schofield offers good projectile stability during firing. Its **adjustable rear sight** , combined with the fixed front sight, allows for fine-tuning the point of impact according to the shooter's preferences and shooting conditions.

A realistic metal construction

Weighing over **1 kg** , this replica provides a particularly convincing feel. The metal frame improves stability during firing while offering excellent robustness for regular use.

6-shot cylinder and double action

The **6-shot cylinder** enhances the realism of the handling, while the **double-action trigger** allows for simple and intuitive operation. The absence of a blowback system promotes more consistent CO2 consumption and improved battery life.

FAQ

What ammunition should be used with this revolver?

The BORNER Schofield Worn operates exclusively with 4.5 mm caliber steel BBs powered by a 12 gram CO2 cartridge.

Does the revolver have a blowback system?

No. This model does not have a Blowback system, which promotes better CO2 cartridge autonomy and consistent operation.

Is the increase adjustable?

Yes. The revolver is equipped with an adjustable rear sight allowing adjustment of the point of impact during target shooting sessions.
