Compact adjustable shooting rest to improve stability and accuracy.

The **Real Avid Ratchet Rest Adjustable Shooting Rest** is an adjustable shooting bag designed to provide stable support for the firearm in front or rear rest positions. Compact and versatile, it adapts to numerous shooting configurations.

- **Type:** Adjustable shooting bag
- **Use:** Front or rear support
- **Adjustable height:** 6.35 to 9.53 cm (small), 8.51 to 13.34 cm (medium) and 17.78 to 24.13 cm (large)
- **Weight:** 2.75 lb (1.25 kg)
- **Adjustment:** Ratchet system
- **Format:** Compact and space-saving
- **Configuration:** Single multi-purpose bag

A versatile support for precision shooting

Whether for scope adjustment, range training, or finding the best grouping, the **Ratchet Rest Adjustable Medium Shooting Support** provides stable and adaptable support. Its compact size makes it easy to carry in a shooting bag without adding bulk to your gear.

Quick height adjustment

Thanks to its integrated ratchet system, the height of the support can be quickly adjusted between 3.35 and 5.25 inches. This range allows for easy adaptation of the weapon's position to the terrain, the shooting table, or the shooter's physique.

Use in front or rear support

Unlike many specialized bags, this model can be used on both the front and rear of the weapon. This versatility allows for a wide range of uses with a single piece of equipment, while also simplifying the transport of gear.

A compact format for the shooting range

Weighing approximately 1.25 kg, this support offers an excellent compromise between stability and portability. It is a particularly attractive solution for shooters looking to minimize the volume of their equipment without compromising on quality support.

- **Transport:** Small footprint
- **Use:** Target shooting and optics adjustment
- **Position:** Front or rear support

FAQ

Can it be used on the front and rear of the weapon?

Yes, this support was designed to serve as both a front and rear support depending on the firing configuration used.

What is the height adjustment range?

The height is adjustable from 6.35 to 9.53 cm (small), 8.51 to 13.34 cm (medium) and 17.78 to 24.13 cm (large) to precisely adapt the support to your shooting position.

Is this model suitable for precision shooting?

Yes, its stability and quick adjustment make it a suitable accessory for precision shooting, optics adjustment and range training sessions.
