Ensures reliable removal of spent primers on compatible Lee presses.

The **Lee Primer Outlet Auto Breech Lock Pro** is a replacement kit including the primer ejection guide and retaining ring, designed to maintain the proper functioning of compatible reloading presses.

- **Brand:** Lee Precision
- **Type:** Primer Outlet & Ram Retainer Ring
- **Compatibility:** Auto Breech Lock Pro
- **Compatibility:** Value Turret post-2018
- **Compatibility:** Pro 1000 post-2018
- **Function:** Removal of spent primers
- **Composition:** primer guide + retaining ring
- **Material:** engineering polymer
- **Installation:** direct replacement of the original part

An essential component for the proper functioning of the press

During **reloading** operations, the proper removal of spent primers directly contributes to a clean and efficient workflow. The **Lee Primer Outlet Auto Breech Lock Pro** replaces worn or damaged original components to maintain normal press operation.

Compatible with several recent Lee presses

This kit was developed for recent generations of **Lee Precision** balers. It is compatible with the **Auto Breech Lock Pro** models, as well as the **Value Turret** and **Pro 1000** balers manufactured after 2018. Its installation restores the manufacturer's intended performance.

Quick and easy replacement

Designed as an original maintenance part, this assembly includes the primer ejection guide and the ram retaining ring. It can be easily replaced during routine press maintenance.

Additional features

- **Category:** spare part for reloading press
- **Use:** maintenance and repair
- **Manufacturer:** Lee Precision

- **Installation:** Original replacement part
- **Destination:** Disposal of used primers

FAQ

Which Lee presses is this part compatible with?

It is compatible with Auto Breech Lock Pro presses as well as with Value Turret and Pro 1000 models produced after 2018.

Is this part intended to replace an original component?

Yes, this is a replacement part that restores the normal operation of the primer evacuation system.

Why replace a worn Primer Outlet?

A component in good condition promotes regular removal of used primers and helps to keep the press clean and functional.
