High-precision biodegradable BBs for the most demanding airsoft setups.

BLS BIO BBs 0.43g White 1000 pcs are made from a biodegradable polymer based on corn starch to offer excellent shooting consistency. Their perfect sphericity ensures smooth feeding and consistent performance in precision airsoft replicas.

- **Weight:** 0.43 g
- **Packaging:** bag of 1000 marbles
- **Color:** white
- **Material:** Biodegradable PLA made from corn starch
- **Biodegradable:** yes
- **Tracers:** no
- **Manufacturing:** high precision
- **Shape:** perfectly spherical

Ammunition designed for precision

On the field, every detail counts. **BLS BIO 0.43g White BBs** have been developed to offer a consistent trajectory and reduced dispersion. Thanks to their perfect sphericity and rigorous quality control, they ensure excellent shooting consistency, particularly appreciated on airsoft replicas configured for precision and medium- to long-range engagements.

The renowned quality of the Precision BLS range

The **Precision BLS** series benefits from the expertise of a globally recognized **airsoft** manufacturer. Each BB is produced to strict tolerances to ensure smooth feeding through magazines and hop-up units. This consistency helps maintain consistent performance game after game.

Biodegradable composition based on corn starch

Made from PLA polymer derived from plant-based resources, including corn starch, these pellets are part of a more environmentally friendly approach. Their design allows for natural degradation in the external environment, meeting the requirements of many fields that mandate the use of **biodegradable pellets**.

Versatility and compatibility

Weighing 0.43g, these BBs are ideal for users seeking increased inertia and flight stability. They are compatible with airsoft replicas using 6mm BBs and can be used on various properly tuned platforms, whether electric or gas-powered, to accommodate this weight.

Additional features

- **Type:** Non-traceable BIO ball
- **Origin of the polymer:** corn starch
- **Use:** precision airsoft
- **Degradation:** natural in outdoor environments
- **Product line:** Precision BLS

FAQ

Are these beads biodegradable?

Yes, they are made from biodegradable PLA based on corn starch and meet the requirements of many airsoft fields.

Which replicas are suitable for a weight of 0.43 g?

This weight is mainly used on properly tuned airsoft replicas to utilize heavy BBs and achieve better trajectory stability.

Are the marbles traceable?

No, these are standard non-tracer BBs intended for classic airsoft use.
