SKU	Designation	French Law	MSRP
PU02010	Blue	Vente libre	39.00 € incl. tax

Optimize the blowback timing of your Hi-Capa ARCTURUS with an adjustable CNC assembly.

The **adjustable CNC Blowback Housing from ARCTURUS** enhances the performance of the **Hi-Capa Tempest, Osprey, and Tactical models** . Its **CNC aluminum** construction and **adjustable Cut Off Timing** system optimize the bolt cycle for a more responsive and customizable replica.

- **Type:** Adjustable Blowback Housing
- **Brand: ARCTURUS**
- **Construction:** CNC-machined aluminum
- **Function:** Adjustment of Cut Off Timing (blowback timing)
- **Compatibility:** ARCTURUS Tactical Hi-Capa, Tempest and Osprey
- **Use:** Upgrade part for Hi-Capa GBB replicas
- **Contents:** CNC blowback housing, piston, seals, screws, spring, and mounting accessories (depending on version)

Optimize the performance of your Hi-Capa

The **ARCTURUS CNC Blowback Housing** is designed for users looking to fine-tune the performance of their **Hi-Capa GBB** replica. Its **Cut Off Timing** adjustment system allows you to adapt the blowback cycle to achieve an optimal balance between responsiveness, gas consumption, and recoil.

CNC machined aluminum

Machined from a single block of **CNC-machined aluminum** , this assembly offers excellent dimensional accuracy and high rigidity. This manufacturing quality promotes smooth operation while ensuring good wear resistance during intensive use.

Custom Blowback Adjustment

The integrated adjustment system allows you to modify the **Cut Off Timing** , in other words, the point at which the gas flow is interrupted during the cycle. This adjustment allows you to adapt the replica's behavior according to the player's preferences or the configuration used, seeking greater speed, better gas efficiency, or a balance between the two.

Compatible with ARCTURUS Hi-Capa cartridges

This component is specifically developed for the **ARCTURUS Tactical Hi-Capa** , **Tempest** , and **Osprey** platforms. Its installation is an ideal upgrade when preparing or replacing an original part.

A part intended for GBB preparations

Whether for optimizing a regularly used replica or for more advanced preparation, this **Blowback Housing** is a technical component that allows you to fully exploit the potential of **Hi-Capa ARCTURUS** platforms, while maintaining a robust and precise design.

FAQ

Which replicas is this Blowback Housing compatible with?

It is compatible with the ARCTURUS Tactical Hi-Capa, Tempest and Osprey platforms.

What is the purpose of the Cut Off Timing setting?

It allows you to adjust the timing of the gas flow during the blowback cycle in order to adapt the behavior of the replica according to the desired performance.

Is this component made of aluminum?

Yes. The Blowback Housing is CNC machined from aluminum to offer excellent manufacturing precision and good wear resistance.
