PU02012	ARCTURUS Nozzle Hi-Capa ImpactX™ RS®	Vente libre	21.90 € incl. tax

A reinforced PA66 fiber-reinforced polymer nozzle for improved GBB system efficiency.

The **ARCTURUS RS® Hi-Capa ImpactX™ nozzle** is made of **fiber-reinforced PA66 polymer** to improve wear resistance. Its **optimized piston seal** promotes better **gas blowback** system efficiency and improves low-temperature performance on **ARCTURUS Tactical Vanguard** platforms.

- **Type:** Complete Loading Nozzle
- **Brand: ARCTURUS**
- **Product line:** RS® ImpactX™
- **Construction:** Fiber-reinforced PA66 polymer
- **Compatibility: ARCTURUS Tactical Vanguard Hi-Capa**
- **Function:** Nozzle for Gas Blowback system
- **Piston seal:** Optimized for improved sealing
- **Advantages:** Increased resistance, improved efficiency, and better performance in cold weather

A nozzle designed for heavy-duty use

The **ARCTURUS RS® Hi-Capa ImpactX™ Loading Nozzle** replaces the original nozzle on **Tactical Vanguard** platforms. It directly contributes to the **Gas Blowback** system's operating cycle by ensuring consistent gas supply and chambering of BBs.

ImpactX™ polymer in reinforced PA66

Made from **fiber-reinforced PA66** , this nozzle offers excellent mechanical strength while maintaining a low mass. This technical material limits wear caused by repeated cylinder head cycles and improves the part's lifespan.

Optimized piston seal

The **piston seal** was designed to improve the system's airtightness. Better gas retention optimizes the replica's energy efficiency and helps maintain more consistent operation, especially when ambient temperatures drop.

More consistent performance in cold weather

Thanks to its optimized internal seal, this nozzle helps maintain better **GBB** system efficiency in cool conditions. It represents a significant improvement for players seeking a more stable gas supply throughout their games.

Compatible with Tactical Vanguard platforms

This **loading nozzle** is designed for **ARCTURUS Tactical Vanguard Hi-Capa** replicas. It is suitable for both replacing worn parts and improving original performance while maintaining excellent compatibility with the manufacturer's mechanics.

FAQ

Which replicas is this nozzle compatible with?

It is compatible with ARCTURUS Tactical Vanguard Hi-Capa platforms.

What are the advantages of reinforced PA66 polymer?

Fiber-reinforced PA66 offers excellent resistance to wear and mechanical stress while maintaining a low weight, ideal for the fast cycling of Gas Blowback replicas.

Why does this nozzle improve performance in cold weather?

Its optimized piston seal improves the sealing of the gas system, which promotes better energy efficiency and smoother operation when temperatures are low.
